Thread: [\[EPIC\] Earn 4\\$ a day, with this tutorial + payment proof\[Android Required\]](#)

drigtime - October 12, 2014, 10:47 am

Hello fellow hackforums.net members, today I am going to share with you a hot topic about earning 4\$ a day, all you need is your android phone

WHAT YOU NEED?

Android 2.2+

Facebook account

Paypal which doesn't need to be verified

Step1. Go to the Play Store, then search for the app called 'Whaff' and download it

Step2. Log in into facebook (in app)

Step3. In order to have an extra 0.30\$ there will be a box, add this code there AE70523.
[RECOMMENDED]

Step4. There are a lot of tabs in the app, but the best one is 'Whaff Picks', it will show you the offers which you can do.

Additional Step. For people who can't see a lot of offers, please download an Android VPN, and use USA as your region, this will bring you at least 12 offers a day.

Step5. You just need to press 'download' on offer, then run it for at least 3 min, you will receive a notification, saying that you have earned x amount, when you download an app you get 0.1\$ for free, when you open it, you can get up to 0.05-0.12\$/day, the offer lasts atleast 3 days, you can like earn 3 times from that offer for 3 days.

Step6. When you reach 10\$, you can withdraw your cash on Paypal, it will take 3 days, or you can have a steam - xbox - play store ... gift cards.

I personally earned 10.5\$ in less than 3 days, and I guarantee that you will like it, I always use this when I go to sleep, so it will take around 20 mins to get 3.5\$ a day

More Cash? WHAFF offers many other picks, that lets you earn more cash, like inviting your friends, (50 friends = 0.6\$ EVERY DAY!!!) only by sending them an invitation, there's also normal Picks where you can view videos and click other offers and I guarantee that you will earn 3\$-4\$ a day from that application, good luck everyone!
