From Digital Art to Real Canvas Paintings

I really love to make digital art for my clients and for me also :)

Because I really love art some years ago (3 or 4) I started painting on canvas :) .

It was a little difficult at first ? as it wasnt like with the graphic tablet , keyboard and the mouse , i had the colour pallet and the brush ?

Past year I had 2 open public expositions and now I slow-started to sell paintings.

Here are some preview's of my work from past 2 weeks :D

Amazing, Keep it up, my first impression was that you only liked drawing women's body, I'm happy to see those portraits and visual art.
