Thread: [Reveal Censored Email](#)

Selmabd - October 13, 2014, 12:00 pm

So im trying out different hack methods and im stuck on this question:

Does anyone know how to reveal a censored email which click forgot email or pass on twitter, instagram, etc.

For example (c*****1@y****.c**.hk) any way to figure it out?

You'll want to gather as much information on your victim as you can.

Normally these types of things are easy to figure out once you have a basic dox on said victim

Agreed with Jay. You're pretty likely to come across other email accounts while doxing them. Just see if they look like they'll match the censored one.
