Hello

Don't know is it right section but here we go..

I register dailymotion publisher account and upload videos etc. That happend about over month ago and i have up 2000 views right now..

Problem is my publisher dashboard looks just plain empty, no impressions, nothing! Is that somekind bug their system right now ? Customer helpdesk just answer blaa blaa..no any reason!

Just wondering if anyone have dailymotion publisher account, is that working ok ?

Thanks ?

(sorry my bad english ? )

First of all you have to edit your profile to match the kind of videos you're uploading. Add picture, about page etc. When you're uploading a video make sure it's HD and for God sake upload correct keywords, unless you have correct keywords it's pretty much useless to even upload a video.
