Start from the bottom, grow to the top, or prosper in the middle.

This server will be based off of three main gameplay elements.

*Power & politics: get your voice heard, and gain power on the server. People should kneel before you.

Politics will be controlled by the people.

Power will be controlled by the people.

*Money & Greed: Simple enough, and to the point. Make money, and become greedy.

Money is controlled by companies & big business.

*Social: Yes, this is a social server.

We will have restaurants and shops, along with other social aspects.

Everyone will be able to have a good time.

I have just managed to get our Minecraft server back up, within the last few minutes. Apologies. You can receive compensation by Pm'ing me.
