I'm looking for someone who leaves quality reviews with real feedback.

Whether it be negative or positive. (For the vouch copy)

Peppermint Butler - October 14, 2014, 11:49 pm

Grievous is now the YouSpread owner!

Huge vouch for him! I was happy to go through the deal of giving him it, wouldn't have wanted to give it off to anyone else that wouldn't be as HQ.

Don't hesitate to deal with this amazing user!

tobyyy99 - October 15, 2014, 10:21 am

Has there been any improvements since you purchased the source and resell rights off peppermint butler? I would love to see a automated system that uploads the scraped videos. All the other aspects off the products is very good.

YouSpread utilizes the unique and typical methods for spreading via YouTube, but enhances the output drastically due to the fact that half of the process of spreading is now dealt automatically w/o any effort. YouTube has continued to prove it self that it is still a very efficient way of spreading and YouSpread outlines that fact.

Now I wonder what this actually does, I watched the video but didn't really understand.

Does it download a bunch of descriptions from youtube videos and replaces the link with yours? It doesn't edit/modify the original description in those videos?

Yes all videos are downloaded alongside with their descriptions neatly in one folder, the description is then replaced with your links.

Well a bot is a program that does manual work humans do but on an automated scale. Would you really want to do this for 5000 videos like one of my customers have? This is where YouSpread comes into play.

Look, this gives you massive amounts of traffic based off the fact that it helps you with replacing the links in descriptions with yours and then once all the videos are uploaded, you will reap the rewards by receiving a lot of clicks to your link from the videos.

Thanks for letting me clarify that!

But making your own descriptions and copying that can also do that, don't get me wrong it's a nice tool but it doesnt increase any amount of traffic.

Dr. Manhattan Official Review!

Intro

Hello again young fellows ! I'm Dr. Manhattan and this time around, instead of making yet another review of yet another eBook, I'm here to bring you guys a review of a program ! Yes, I also make those, but in a rather low low rate since eBooks are always hot in here. But, without further due, lets get to the point. The program that I'm going to be reviewing will be the following one :

YouSpread ---> Spreading, PPD/CPA, Advertising !

I got to say that i was given the necessary time to review it ,and now that I've completed my review, i will post it right away. Like always, I am in no way affiliated with the original seller, neither was this review influenced by it. As so, and in order to create a very detailed review about my thoughts of the program, i will be judging it in 5 different points of view :

- 1- Content
- 2- Functionality
- 3- Ease of Use
- 4- Design
- 5- Bugs?

All of these sections (except 5) will be given a rating that can reach up to a 5 star rating
Without any further due, lets get to the review

Content

Oh boy what a nice piece of software that this program is. If you are into the CPA industry, then you know how good and sucessful you can be with a good video and a fairly good description and all. Well imagine in your head that this program makes all the hard work for you ! It gets you the video, the description and it even replaces any kind of link in the description with your intended product ! Awesome isn't it? And it does things rather quickly, without no kind of delay ! It's absolutely perfect !

Score:

Functionalities

In this particular space of my review, I'm always trying to focus on the functionalities of the programs that I am being given to review. This one is intended to do a specific and really nice job , so I will solely focus my attention in it. So. without further due, lets talk about :

Scrapping and Getting them videos !

It is simply the most sweet and really easy going that I've seen in a program that was designed to do specifically this. You only need to input the keyword that you want to earn money from (taking the side that I'm using it for CPA/PPD) and just wait for the program to scrape youtube for the amount of videos that you asked him to do. You can also have the option to only save the viode URL or the video itself if you need to make some changes to it. All of this just takes a matter of minutes (depending on the amount of videos that you want to look for) and is really a ease. You are also able to add your own link so that you don't waste time searching in the whole description text where the hell he is. Overall it works really well, and if the owner manages to add the ability to upload to youtube, then you got here a program of the year !

Score:

Ease of Use

Using the program is quite intuitive i must say. You get a simple menu and window that asks you for basic data that you have to input in order to get the videos starting to rolling in. Personally, I had a minor problem getting the API KEY from youtube , but still, after a quick google search I was able to get one and go straight away to them videos ! Really simple interface and you can go along with it just fine .

Score:

Design

The design is simple and intuitive I must say. You can see that it's a new program, it's in his beginners steps, but it packs quite a punch ! The design is slick and new and it really helps you get around the program really easily ! You couldn't ask for a better one ! 3 Tabs , each of them with a specific theme, still you will only use one of them , which would be to get the videos ! The other ones are related to information and deals like those. Even tough it's simple , I really liked it !.

Score:

Bugs?

During the time that I was using this program, I wasn't able to find any kind of bug that would make my PC shut down, or the program itself. I did encontered a bug that said that the scrapping was done, but then no video was found in the directory. But still, I just closed the program and reopened it and it just continued to scrape videos like he used to do. Really don't know what I did wrong in

there, but it never happened again !

Conclusion

A really nice piece of software. And with the updates that you will be buying with the package, I really believe that this product has a nice future ahead of him. Don't hesitate to buy if you are into the CPA/PPD business ! You won't regret it, it will save you a lot of work !

Dr. Manhattan Official Review!

Intro

Hello again young fellows ! I'm Dr. Manhattan and this time around, instead of making yet another review of yet another eBook, I'm here to bring you guys a review of a program ! Yes, I also make those, but in a rather low low rate since eBooks are always hot in here. But, without further due, lets get to the point. The program that I'm going to be reviewing will be the following one :

YouSpread ---> Spreading, PPD/CPA, Advertising !

I got to say that i was given the necessary time to review it ,and now that I've completed my review, i will post it right away. Like always, I am in no way affiliated with the original seller, neither was this review influenced by it. As so, and in order to create a very detailed review about my thoughts of the program, i will be judging it in 5 different points of view :

- 1- Content
- 2- Functionality
- 3- Ease of Use
- 4- Design
- 5- Bugs?

All of these sections (except 5) will be given a rating that can reach up to a 5 star rating
Without any further due, lets get to the review

Content

Oh boy what a nice piece of software that this program is. If you are into the CPA industry, then you know how good and sucessful you can be with a good video and a fairly good description and all. Well imagine in your head that this program makes all the hard work for you ! It gets you the video, the description and it even replaces any kind of link in the description with your intended product ! Awesome isn't it? And it does things rather quickly, without no kind of delay ! It's absolutely perfect !

Score:

Functionalities

In this particular space of my review, I'm always trying to focus on the functionalities of the programs that I am being given to review. This one is intended to do a specific and really nice job , so I will solely focus my attention in it. So. without further due, lets talk about :

Scrapping and Getting them videos !

It is simply the most sweet and really easy going that I've seen in a program that was designed to do specifically this. You only need to input the keyword that you want to earn money from (taking the side that I'm using it for CPA/PPD) and just wait for the program to scrape youtube for the amount of videos that you asked him to do. You can also have the option to only save the video URL or the video itself if you need to make some changes to it. All of this just takes a matter of minutes (depending on the amount of videos that you want to look for) and is really a ease. You are also able to add your own link so that you don't waste time searching in the whole description text where the hell he is. Overall it works really well, and if the owner manages to add the ability to upload to youtube, then you got here a program of the year !

Score:

Ease of Use

Using the program is quite intuitive i must say. You get a simple menu and window that asks you for basic data that you have to input in order to get the videos starting to rolling in. Personally, I had a minor problem getting the API KEY from youtube , but still, after a quick google search I was able to get one and go straight away to them videos ! Really simple interface and you can go along with it just fine .

Score:

Design

The design is simple and intuitive I must say. You can see that it's a new program, it's in his beginners steps, but it packs quite a punch ! The design is slick and new and it really helps you get around the program really easily ! You couldn't ask for a better one ! 3 Tabs , each of them with a specific theme, still you will only use one of them , which would be to get the videos ! The other ones are related to information and deals like those. Even tough it's simple , I really liked it !.

Score:

Bugs?

During the time that I was using this program, I wasn't able to find any kind of bug that would make my PC shut down, or the program itself. I did encountered a bug that said that the scrapping was done, but then no video was found in the directory. But still, I just closed the program and reopened it and it just continued to scrape videos like he used to do. Really don't know what I did wrong in there, but it never happened again !

Conclusion

A really nice piece of software. And with the updates that you will be buying with the package, I really believe that this product has a nice future ahead of him. Don't hesitate to buy if you are into the CPA/PPD business ! You won't regret it, it will save you a lot of work !

I didn't know which product you purchased until you said what it was.

I have two others that are password protected. The member, Peppermint Butler, should help you shortly.

Yes this is still being sold, if you'd like you can add Grievous on Skype @ grievoushf

You can add him and ask any questions you may have.

Marcus Hopson - January 25, 2015, 12:55 pm

I've asked this question multiple times as well as others have asked it. Does the program upload back to youtube as well? Let me know i'm interested.

I have owned the product since Pepper Mint Butler was selling it, and as far as I know It doesn't have the feature to automatically upload the cloned videos. You will have to manually upload the cloned video if there haven't been any changes since I used it the last time.

Correx - February 5, 2015, 3:45 pm

Good luck with sales, and I hope Grievous comes back soon! Have a nice day everyone :)
