Thread: [\[Tutorial\]Close someones skype forever\[Tutorial\]](#)

?Criminal - October 16, 2014, 3:49 pm

Alright im getting sick of so many kids acting hard distributing this method when I literally been sitting on it for months, it was legit one of the millions of methods I have on my usb drive. Anyways it's ridiculously easy to do and im not sure why people are selling it for crazy amounts of money(70-100).

Before we begin this method im releasing is one of many but I don't care about this one but anyways it abuses the closure process skype has in case you want to delete your skype where you can never log in again and remove your self from the directory, if anyone actually read the terms of service it blatantly tells you you can remove your skype and people eventually started to abuse this to pwn other peoples skypes and get them fucked.

1. Go to skype live chat(won't spoonfeed the link find it may edit it in later)
2. When you enter the live chat tell the agent you've been harassed/spammed and feel theres alot of personal information on your skype that alot of people seem to be bothering you about and you just want to delete your skype forever and want it removed from the directory as well.
3. If you get a good agent they will say something along the lines of your skype will be deleted in a few days not sure if theres a way to make it instant maybe it is havn't done it in awhile
4. The skype will be auto logged out and the skype will no longer appear in the directory when you try to find it indicating it's been deleted from skypes system
5. The skype is fucked and the victim can't do anything about it.

Sorry I rushed out this release and didn't pretty it up but im not going for quality just wanted to show how simple it is to get a skype closed.

Can you provide a link to live support? Thanks m8 nice tut

Update: This tutorial doesn't work anymore. To access live chat you need to sign in, doing this will show them your real account which they will remove.

Iv'e always signed in with dummy accounts and they always ask you the account to pull up during your live chat session so that wouldn't even matter at the end of the day what account you enter the live chat with. Iv'e done it on my own skypes without much validation a few months ago so I reckon if you know the victims email attached which usually most people do this methods chances of working increase. I know for a fact this is one of the methods being passed around since theres tons of

different variations.

Simply™ - October 16, 2014, 4:16 pm

LOLOLOL it worked. Thanks m8!

Just use this method and I don't give stuff for free to leechers maybe if you contributed more.It worked for simply so it should work for you if you do it right.

I don't leach I don't leak and yeah I'll contribute more NP.

Ive tried it on some Dummy accounts and went into multiple sessions with different people and they always say give me the email that belongs to the account I say oh its terminated and they send it to the email i'll give them but they make u sign a long ass form is there a way around that shit?

Nigga From Africa - October 17, 2014, 4:56 am

My face when the owner calls skype and says he has been impersonated and then sues skype due for not protecting his account.

Angel Beats?? - October 17, 2014, 5:02 am

It says you need premium to access live chat. What?

Know go to live text chat

https://login.skype.com/login?return_url=https%3a%2f%2fsupport2.microsoft.com%2fskype%2fhostpage.aspx%3flanguage%3den%26locale%3dEN-US%26oaspworkflow%3dstart_1.0.0.0%26needslogin%3dtrue%26wfname%3dskype%26ccsid%3d635491216571402402&partner_id=3fdb6f9f635903ab490938ed648376bb&token=05d721b4-8cbb-4602-90f0-25a01cdbea23 sign in and its gonna tell u to pick ur topic pick privacy and security on the top bar and on the bottom one pick spam/Adult content and click next and it shows text chat support it might say u have to wait 1 minute or more but if u just click on the live text chat it will connect you to a live person in like about 10 seconds hoped this helped!!!

Sedo - October 17, 2014, 5:52 am

I have done this before it is really easy to do because they have access to doing that.

Angel Beats?? - October 17, 2014, 5:56 am

Will they check my ip and shit if I do this? Do i need to be on a vpn?

Well that didnt work I got asked to fill out a form..

I used a VPN and they told be to write the form still so if he has a different method that would be nice.

Simply clearly is an advanced social engineer like I am and has been doing it for awhile, he obviously got around the email form by going to another section of the live chat I assume, ask him if you want because he took a screenshot of the confirmation your supposed to get when it works.

Nigga From Africa - October 17, 2014, 9:41 am

Sounds like a pretty easy method.

Is there a link to livechat without having to log in?

cba to make a new skype.

No I don't believe so you might need a dummy account to log in.

Man16 - October 18, 2014, 11:24 am

Can confirm this works LOL. I had to do more than this tutorial suggests which can be done by social engineering methods

Narcissistic Behaviors - October 18, 2014, 11:27 am

Skype support is pretty stupid. And yes Jeremy is selling a public method because he is retarded and a poor skid and needs money.

?Criminal - October 18, 2014, 11:30 am

So 2 users have got it working so far, can't believe this works still after all this time, iv'e been letting it rot since I don't care about the topic of "account removing/deletion" so I'd figure I would let you guys enjoy and get use out of it.

gothikapwns410 - October 18, 2014, 11:51 am

LOOOL

this is amazing

thanks for this bro.

TheMike - October 18, 2014, 12:07 pm

I'll test this hope it works :) Thanks for this!

ASMR - October 18, 2014, 5:13 pm

i did this with a friend of mine sometime ago, it was pretty awesome :D i can confirm it works or atleast did work.

Oh boy, you're quite the retard. I'm giving away the public method in another one of my threads. There's no need to be so scared baby. I wish we could settle this dispute one way without you being a pussy about it. The method that I am/was selling does not involve live chat.

I'm selling the method that I'm giving away < logic.

Mutiny - October 18, 2014, 9:29 pm

They make you " authenticate " the account now, she said she was going to delete it but then this fucker pops in and says you need to have access to authenticate it..

See? Exactly. This is the public method that was eventually going to get patched. The method that I am/was selling is in their protocol and does not require authentication.

I guess it varys from agent to agent because 2-3 people got it working in this thread apparently and it also varys on how good you can se someone. There are better methods but im keeping those under wraps for now so at least this is better then nothing.

andy4895 - December 31, 2014, 2:49 am

Soooooooo, I know this is an old thread and all but this does still work.

Posted some kids dox on 4chan etc last night, he got so shook and started making all sorts of threats.

I've decided to naturally be a c**t back.

Got onto a support at 3 this morning with a support lady named Katrina, whilst she was a damn slow typer she did get me the result I wanted, his account to be closed.

Thanks for the tut maybeBlue, it was pretty good!

Here is the proof of course;
