Thread: [ITS BACK AND BETTER Velodyne vFree Bluetooth Headphones \\$40 + Free Shipping](#)

well then - October 16, 2014, 7:41 pm

These ones are probably higher quality, and they are bluetooth.

Aw man! When these first came out I wanted these instead of the other ones...might just go for this...

At least this company actually sells their headphones for what they are worth.

I'm currently using the \$25 headphones and they're quite good for the price. Lightweight but with plenty of bass and they're a good fit as well. If I was into wireless headphones, I'd definitely get these for \$40.

Can anyone comment on the sound quality of these wireless headphones?

Nice Job Man! Can't wait to order these

Wesley Snipes - October 18, 2014, 6:33 pm

These headphones are solid for \$40 but I warn you guys...DO NOT BUY FOR RESELL!!!! I bought 2 of the vLeve ones from before and barely got my money back out of them. I posted on Craigslist and didn't get anyone interested and on eBay a tooonnn of people are trying to sell them. They are worth it for personal use but they have no resell value. Just a warning! Otherwise, have fun with your discounted headphones!

Speaking from a person who doesn't use headphones often, I say that the quality of these headphones are quite outstanding.

Have I seen better? Yes

Have I heard better quality? Yes

But I've never seen anything for 25\$

I don't have the bluetooth so I can't say if they're the same or different, but they are okay for 25\$ or 40\$ (Bluetooth)
