MasterJesus - October 17, 2014, 8:13 am

Hello guys, so I have started with this small online project that includes useful scripts, just for the fun of it :)!

The website includes, online Email Bomber, Snapchat Bomber, Txt Message sender, Free netflix accounts " list updated every week ", Cracked working programs section and a chat section!
I will be adding more useful scripts like IPlogger and much more in the future!

Small screenshot of the website

If you would love to have a account on our website, please register a account on our website, and then post bellow your username so I can activate your account :)

A thank you will be very appreciated <3

Website Closed.

EDIT The database was corrupted due of a lot of members we had registered on our website!
Re-created the database and fixed the error, but unfortunately everyone needs to re-register!

I'm not going to try to complain. I love the website, but the Snapchat Bomber tool seems a bit fishy to me. I'd used it once on an alternative Snapchat to get my points up, and about 5 minutes later, the password to the account was changed. I'm not blaming your services, as they are pretty cool, but that specific tool seems a bit off. Anyways, thanks for doing this, and I hope to see more great things in the future. :)

nurgah man - December 9, 2014, 7:48 pm

damn whats with all of these online netflix account generators? how exactly does that work? doesn't make sense to me, are they fully functional and working with no problems whatsoever? you'd think a site like netflix would be on top of that shit lol.

M1L3NK0 - December 9, 2014, 8:21 pm

Hey, since the update with the Netflix account, I can't find the account that I'm using for my Xbox, and it still works. I want it on my PC. If you could do me a favor and PM me the account, that'd be great! The password was binaca or something of the sort. No numbers.

this tool is "free" i mean its one of those ones where its like take this 45 min survey to unlock the download and then the download has a password and to get that password you need to take another survey. and then the product doesnt exist anymore because of to many users... what im saying is that you cant sighn up unless the owner allows you to.. then yo need to get verrified by

him... not worth it in the long run

Well, it was free. It was kinda expected, don't you think buddy? Free projects, don't last long, most of the time at least. (there are some exceptions of course). ?
