Sometimes. It can be caused by other bacteria and viruses too. I just think it's funny to assume that everyone that has it got it in that way. lol

oRequiem - October 17, 2014, 9:41 pm

I've had pink eye before, you can probably use eye drops. Eye drops can help, never touch your eye considering it is contagious. Never touch your eye until it's gone, if you did or will, wash your hands with soap and water. You just have to wait it out really. Eye drops is probably your best bet. Mine went away faster than I thought when I had it for my first or second time.
