This site is absolutely pathetic. They're treating it as if it's rapidly spreading throughout the US. Hope no one actually purchases this.

People are so stupid, they think that it will kill everybody, and they will gain money because people are scared? Really?

Im just being a messenger do not go to this website and CNN is exploiting it in commercials. I have zero affiliation with them I just saw the commercial thought I would share

I totally agree and I think they said it was 15 bucks really for a book that gives you the same information that the CDC gives out?

Edit your thread and remove the link then if you have no affiliation.. It seems as if you're advertising.
