Thread: [\[HELP\] How to reverse engineer?](#)

Rafaelinio - October 18, 2014, 1:18 am

I'm looking for a software that can help me do this to learn how to bypass a serial number (ill use my own program for learning)

I remember my IT teacher talked about a program that let's you skip to different parts of a program bit I don't remember the name?

Plus, let's say I download a reverse engineering program, how do I use it ?

Thanks

There's an entire section for it here on HF.
