Thread: [My first coded Program!!! Release](#)

qbOFFICIAL - October 18, 2014, 10:46 am

Hi guys

Today i created my first program in visual studio 2013 and i am letting you all see it.use it.

So i have no clue how to use virus total and it does detect something and i have no clue what it is i was told it was because my program takes control of another process (skype hence the name) so i included the project file so you can check the code and shit.

Here is virus scan:

<https://www.virustotal.com/en/file/26ed4ddc7bd26f8782016aa9c6d3de4812b9bae7bf83bf97ee9bf17af7cd7eef/analysis/1413654109/>

Here is dl: <http://www.mediafire.com/download/g76obgn0jb9mub2/Skypebot.rar>

Here is the interface BTW Qball is my nickname my friend gave me a while back :)

Interface:

CODE: <http://pastebin.com/1w25xF7n>

Waiting for someone who vouch for this ?

And congratulations on your first program OP

Could you just post the source code onto pastebin with vb.net syntax highlighting please. I'm too lazy to download and plus I don't downloadfiles from HF lol.

Secret Agent - October 18, 2014, 10:54 am

This is the first program you coded and you already coded a Skype bot. Sure..

LordCoder - October 18, 2014, 10:54 am

Why do you add a TextBox to write the contact nickname when you can put a ComboBox with "skype.Friends"?

qbOFFICIAL - October 18, 2014, 10:55 am

I did not know of this, I was actually trying to do this but could not figure it out

(Oct 18, 2014 10:54 AM)Torban Wrote: [\[CITE\]](#) This is the first program you coded and you already coded a Skype bot. Sure..

I did not do this on my own i obviously had some help but yes my first program was a skype but. Its only about 10 lines of code :)

Yeah skype4comlib is really hard to use, how could he even do that!

You just copied this <https://www.youtube.com/watch?v=CRie-jtLJ0w>

Here's how you add contacts to a combobox

Code Public WithEvents Skype As New SKYPE4COMLib.Skype

For i As Integer = 0 To Skype.HardwiredGroups.Count - 1

 If Skype.HardwiredGroups(i + 1).Type = TGroupType.grpOnlineFriends Then

 For j As Integer = Skype.HardwiredGroups(i + 1).Users.Count To 1 Step -1

 ComboBox1.Items.Add(Skype.HardwiredGroups(i + 1).Users(j).Handle)

 Next

 Exit For

End If

NextHope this helps

 For j As Integer = Skype.HardwiredGroups(i + 1).Users.Count To 1 Step -1

 ComboBox1.Items.Add(Skype.HardwiredGroups(i + 1).Users(j).Handle)

 Next

 Exit For

End If

NextHope this helps

Or you can just:

PHP Code

<?php

Public WithEvents _skype As New SKYPE4COMLib.Skype

For i As Integer = 1 To _skype.Friends.Count

 If _skype.Friends.Item(i).OnlineStatus <> TOnlineStatus.olsOffline Then

 ComboBox1.Items.Add(_skype.Friends.Item(i).Handle)

 End If

Next

lol.
