Thread: [VPN Diversion](#)

Graphic. - *October 19, 2014, 1:13 pm*

Hey guys,

i was bored so i've written a program which allows you to access to hackforums or other websites with a vpn block.

It means the vpn is bypassed for the choosed website (the traffic for this website goes directly over your network and not over the vpn service).

The tool automatically retrieves the gateway ip-adress, you only have to click on the Hackforums button.

If you want to add another site fill in the "Website" field and click on the "Start" button.

Images, pleeeeeeease, that will make me happy.... and probably some others too.

AEDEAD - *October 19, 2014, 2:30 pm*

Program is safe.

Code Dim text As String = "> written by GraphiC <"
