WORKING WITH ALL STEAM STEALERS AS OF 30.10.2014!
Latest Update: 15.11.2014

I recommend both stealers.

(Nov 2, 2014 03:09 PM)l0lfighter Wrote: [\[CITE\]](#) OK, so 5 hours after I've bought it, I think I'm able to tell u my results.

When I read the ebook first i was pretty disappointed, because i already knew the tactic and i was like "wow, i really paid 50 dollars for something I already knew"

But after reading it more carefully, i realised that there are actually lots of small things that i have never thought about but which are actually pretty important.

So then I set up everything and started to use it. After about half an hour:

<http://prntscr.com/52fta3>

My first knife, everything worked fine. So i just continued to use it, and after another 30-45 minutes i already found my next victim who send me my second knife :D

<http://prntscr.com/52fr9>

Another 45 minutes later, 3rd victim who sent me so fucking much items that i couldnt put them in a screenshot. However skins worth around 400 (400!!!!) Euro.

After I had made so much profit I was pretty much done for this day, however my mate persuaded me to try it with one last guy, and well, it worked :D

Once again too many items to put in one screenshot, but another 520 (520!!!) Euro in skins.

So my result after 5 hours of using this tactic:

11 pages of pure keys (<http://prntscr.com/52fv3c>) + Items on the market which will get me another 400 Euro (<http://prntscr.com/52fvba>)

And even though you probably wont believe you, this is true and fucking awesome. Can't wait to get back from school tomorrow and make another 1000 Euro :D

If anyone is wondering wether to buy this tactic or not: DO IT. It is worth it so much

Might be common sense to some people, but im just offering this for those who want my way of doing what I do with the stealer.

It isnt mass spreading either, it's targetting inventories. No spreading over youtube or anything like that.

Cecilia - October 19, 2014, 11:11 pm

Thank you for making the ebook. I'll get Lemmon to update the OP to include a link for this.

I'm just wanting to get more information before possibly investing into something like this.

I've been around the CS:GO scene for a while and have a working method to get the items I need, although this would most likely be a lot faster than doing what my method contains.

Now my question is: So what you're trying to say is that you're looking for specific inventories?
What's the difference of this and a spreading eBook is what I'm trying to ask.

This isnt spreading your file, you target people. Let's say you see someone with a knife in game, now that's your target and that is what my method contains. You find wealthy people and steal their inventories.

This isn't spreading your file over youtube, torrents ect ect.

How is it confusing? You asked how this is different from any spreading method and I told you that you don't mass spread the stealer. You select targets over steam.

Spending 2-3 hours could potentially get you \$1000+.

What I'm saying is, what's the difference between having common sense and having this eBook with your methods.

As you stated, you're going for those who have expensive items, that there is common sense.

My question as stated before: How will this benefit me at all from me just buying the stealer and doing it under common sense understandings.

The way im getting my targets inventories is why this is different from any spreading method. Sure it's common sense targeting the wealthy people, which is obvious that I do. But getting those victims is what my method is about.

You won't get them by linking them your download link, or telling them to run that for a working hack.

This isn't spreading over forums or any basic spreading method, if you have a lot of experience in spreading this might not be for you.

Common sense can mean anything, common sense for you might not be for others aswell.

Any further questions can be taken over pm.

The way I see it, you are giving us a method to spread a steam inventory stealer, taking away the efforts of other people for your own gain. Hell, I'm not sure the program is even allowed.

It's just as a rat, besides it is automated, and im not taking away my own efforts? I do this myself aswell.

Any further questions can be pmed to me ?

Correct me if i am wrong,

But since this wont be a 'human error' valve will have the full rights

To take the items back to the person?

Most scammers gets away by putting something else in the trade

To get the msg from steam support saying 'All trades are final'

So you say you have ways to cover yourself in the ebook from getting your steam account suspended? Do you know if they suspend steam accounts on the same IP for things like this?

Also, this is quite expensive - Hope it is HQ :)

It is allowed to have several steam accounts, so being on the same ip as another does not matter.

One more question, is this just a way of spreading and targeting csgo players?

Alright, I purchased this ebook awhile back & I am going to give my honest thought of it...

Yes... This method can, and will work although I have not had any luck with it. The method itself is pretty common knowledge that anyone that has steam stealer would have thought of themselves. I have had MUCH better luck with my own methods. In my opinion this book is not worth \$40 to tell you something you already know. I am in no way trying to trash the sales of your ebook, just giving my honest review. GLWS

Aaand the profit is real ?

l0lfighter - November 2, 2014, 2:09 pm

OK, so 5 hours after I've bought it, I think I'm able to tell u my results.

When I read the ebook first i was pretty disappointed, because i already knew the tactic and i was like "wow, i really paid 50 dollars for something I already knew"

But after reading it more carefully, i realised that there are actually lots of small things that i have never thought about but which are actually pretty important.

So then I set up everything and started to use it. After about half an hour:

<http://prntscr.com/52fta3>

My first knife, everything worked fine. So i just continued to use it, and after another 30-45 minutes i already found my next victim who send me my second knife :D

<http://prntscr.com/52fr9>

Another 45 minutes later, 3rd victim who sent me so fucking much items that i couldnt put them in a screenshot. However skins worth around 400 (400!!!!) Euro.

After I had made so much profit I was pretty much done for this day, however my mate persuaded me to try it with one last guy, and well, it worked :D

Once again too many items to put in one screenshot, but another 520 (520!!!) Euro in skins.

So my result after 5 hours of using this tactic:

11 pages of pure keys (<http://prntscr.com/52fv3c>) + Items on the market which will get me another 400 Euro (<http://prntscr.com/52fvba>)

And even though you probably wont believe me, this is true and fucking awesome. Can't wait to get back from school tomorrow and make another 1000 Euro :D

If anyone is wondering wether to buy this tactic or not: DO IT. It is worth it so much

mikezpro - November 2, 2014, 2:40 pm

Wow l0lfighter... That's amazing!

I'm still thinking of getting this ebook but 50\$ is alot after just buyin the Stealer and buying L33T haha...

Sent to both above.

Visualize - November 6, 2014, 7:12 pm

Honestly this is not some unknown or amazing method... I bought the premium package and I didn't receive the bonus (the first download which might of contained that was removed by OP for some reason...)

But anyway at its core there really is nothing special about this at all. Now this may be worth it for the live tutoring, but I am not even sure if it is viable with my timezone difference. All in all, save your money and think of your own method because chances are, you will stumble to something close to this. I pretty much had a method similar to this one before I even bought this.

(Nov 8, 2014 10:47 AM)MegaYouTubeViews Wrote: [\[CITE\]](#) What is this method offering more than the steam stealer already has? Are we talking about searching for people with expensive items to know who to target?

It includes methods on finding them but to get them aswell, a steam stealer only offers the ability to do so. This is a e-book on how to get them, and as you can see in my vouches and customer proof it works pretty well.

None of my vouches are from non customers.

I just msg edin stealer on his thread about having no experience to this kind of stuff. If i buy your method, but im totally new to this will it work?

Also, how long do you see these "stealers" running until they all get patched? Unless someone keep remaking them or something?

I can't say if or when the steam stealers will be patched, but from looking at it steam is very slow fixing these kinds of things.

And yes this will work fine with edin's stealer, doesn't matter if you are new to this. Might take some time to set up and get going but you will get stuff :)

????!!?!? - November 11, 2014, 5:49 am

Is this something like where you join a CS:GO group and then find a guy with valuable inventory and add him on Skype or get him on Mumble then tell them to download a guide?

If not, PM me.

Baysick - November 11, 2014, 10:36 am

When will you do a sale again? I missed the same date, and since I only have about \$30th now until I get paid on christmas.

Truzzie - November 11, 2014, 10:51 am

There won't be a sale again, most likely not in weeks/months.

Baysick - November 11, 2014, 11:07 am

man that sucks, guess I'll just have to wait till christmas to purchase.

Tremo - November 13, 2014, 11:07 pm

Does this only work for CS:GO or does it work for TF2 as well?

Built for CS:GO, and im sure you asked me this over pm's before ?
It would be confusing for tf2.

Police 10-13 - November 14, 2014, 12:46 am

Its actually this version, that's a written fact!

I have both the version on this thread, and the version from the leak.. Its exactly the same.

Ifinger - November 14, 2014, 1:29 am

Can you explain why it was changed from \$1000+ to \$2000+ in same amount of time and when does "sale today" end? It's been more than today.

it was changed because the profits changed by several customers,
I removed the sale a few times but decided to keep the sale going.

And for the guy claiming he got my current version + the leak, it isnt the same and you arent a customer :)

Defy_ - November 18, 2014, 12:53 pm

Very much interested in this. One thing I would like to ask is that would this be effective against people that potentially don't like me and don't want to have anything to do with me?

Like, say I'm targeting people that I have an agenda against and not necessarily a random person.

This method is currently being given away publicly in the giveaway sections along with some other people posting about it. Consider this before buying. I asked the owner of the thread to mention this in it however would not. Not sales trashing, it was a good method however it's public atm and I don't want anyone else to spend 35\$ for it until it's updated. The op did say that he would update the ebook so when he does that maybe it will be better.

SIM-2184472 - November 21, 2014, 3:46 pm

Public method now, good method but it's being given out for free elsewhere on HF. Not worth the \$35 seller is asking for anymore, at least IMO. If he updates the method it would be good again.

TreeWeep - November 21, 2014, 9:46 pm

Truzzie - November 23, 2014, 10:19 am

This isn't a discussion thread, my method isnt leaked nor public.

I understand that you could think so as there is methods out for free which have the same basic tactics but it is not the same.

I have contacted everyone here on hf that gives away these "methods" and none is the same as mine, but I understand you could think so.

Any further questions can be taken over private message as it serves no purpose other than sale trashing.

Also im gonna start to enforce the part where it is not allowed to share this under any circumstances, meaning if I see you share this with your buddy I will remove your license.

Calvin Candie - November 23, 2014, 11:55 am

Yea I suppose it's not the same method. We might have slightly overreacted as it's very similar to his method but it does showcase some interesting smaller details in the ebook. I just got more annoyed that he blamed my friend for leaking it to search if it was public and when we found a similar method it annoyed is greatly. Overall the ebook is well written and is not public.

Truzzie - November 23, 2014, 3:20 pm

I'm heading to bed, if you buy when im asleep you will receive it when I wake up :)
