Hi, some of you may have seen my other post about this program... Well, now it's "finished" and I'm releasing it to you guys. I'm totally accepting ideas and improvements ?

A simple and mostly clean program, have fun.
(by clean I mean not so messy coding :D)

And if I feel generous enough some of you can have the source if you want, just post ;)

Oh and btw, theres some kind of shitty bug that wont load the profile picture from time to time
