Thread: [WANT TO OWN A GENERATOR? LOOK HERE - RIGHT NOW!! AMAZING FEATURE](#)

Entire - October 21, 2014, 11:00 am

Hello HF ?

Today I am starting a shop for account generators. This is very basic, and all that is needed from me is to help set this up, and I have to update accounts using lists given by you.

The reason why this so good? It includes a feature that nobody, that I have overcome on the NFA section has included. Once an account is generated, it is then "hidden", so no other user can generate the account, until you reset the accounts. I see people ask this on every thread, so I'm sure it will a few sales up for you.

Some other features are, that if you want to update, you can do with using using a simple option. You get a message box asking if you want to update, with yes or no. Yes means you get a pop up with a destination, and saves it. No obviously means resumes current version. Good if your wanting to change the theme after a few sales.

Another thing is that, if you ban a user, the user's app should automatically be deleted.

Plus, all accounts are encrypted.

If you're an ub3r, this would defo be a great thing for you to have, as your able to post in NFA section.

The above is the starter design given, you can update news when ever you wish, along with updating the contact info within a sec.

You can add as many account types as you want. This is overall the best generator on the marketplace.

If you want to purchase, I will only do sales through HF PM system.

If you are confused about anything, you can ask me and I will respond below.
