Yeah, they have some pretty decent looking shoes on there too. Sadly my feet are too big for all of them ?

I've seen most of this stuff for cheaper before on sites such as aliexpress. Word of advice; anything on a black mannequin is made of garbage.

Wow, prices are actually very reasonable. Anyone have any experience with quality and shipping?

I was going to buy stuff but they had a lot of negative reviews, like the clothing is cheap but you get what you paid for and the shipping is expensive it's located over seas in china.

The quality is like shit there, i've bought from a similar store and recognize those brands..

I've bought one of the jacket/sweater from eBay, the same jacket on the website, the size is smaller than normal (get a size bigger) and it's not really that good.
