Thread: [NEW METHOD: Untraceable by Resolver for Skype! \(END RESOLVERS FOR GOOD\)](#)

well then - October 21, 2014, 9:48 pm

I want everyone to be protected by these resolvers. For your own safety.

Before we start, make sure your Skype settings are set to this:

1)

Go to <http://www.peerblock.com/releases> and download the stable release of Peerblock

2)

DL and install it (safe program)

Check everything except HTTP (checking HTTP will block websites key parts and will not let it load correctly.)

Also let the application do automatic updates if it asks.

NOTE: Let the program run in the BG so it will always block impeding connections.

Now try to resolve yourself. It wont work, right? You're now protected!

What now Skype Resolvers?

This program can also hide your identity when you are torrenting your 100% legal Mozart Sonata #77 DVD Rip

FAQ: If you get a connection that has the word "botnet" in it, do not worry! [Read this.](#)

(I created this method)

Hunter.. - October 21, 2014, 10:15 pm

I haven't tried this, but this looks promising. I stopped using skype because skype resolvers and stuff.

Mudkip - October 21, 2014, 10:17 pm

I think peerblock created this method... not you :)

Redemption . - October 21, 2014, 10:17 pm

Posting to find download tomorrow thanks for the release

well then - October 21, 2014, 10:24 pm

(Oct 21, 2014 10:17 PM)Mudkip. Wrote: [\[CITE\]](#) I think peerblock created this method... not you :)

Peerblock made the program, but I created the method on how to use it to your advantage for Skype :)

Redemption . - October 21, 2014, 10:25 pm

Btw j nice OP name haha one letters ftw

Ignignokt - October 21, 2014, 10:27 pm

Nice method OP. I'll try it out tommorow.

Peppermint Butler - October 21, 2014, 10:28 pm

(Oct 21, 2014 10:24 PM)J????????????????? Wrote: [\[CITE\]](#) Peerblock made the program, but I created the method on how to use it to your advantage for Skype :)
so what part of peerblock allows this method to work?

well then - October 21, 2014, 10:32 pm

(Oct 21, 2014 10:28 PM)Peppermint Butler Wrote: [\[CITE\]](#) so what part of peerblock allows this method to work?
Quoted from their site:

Quote:1. What IS PeerBlock?

The short version is: PeerBlock blocks "known bad" computers from accessing yours, and vice versa. Depending on the lists you have it set up to use, you can block governments, corporations, machines flagged for anti-p2p activites, even entire countries! Whether you're sharing files with Bittorrent or just surfing the web, PeerBlock can help protect you from the bad guys.

Won't allow Skype Resolvers to access your computer -> no grabbing of IP.
If that is how it works.

Peppermint Butler - October 21, 2014, 10:34 pm

(Oct 21, 2014 10:32 PM)J????????????????? Wrote: [\[CITE\]](#) Quoted from their site:

If that is how it works.

Awesome!

Why does it say that all these Colleges are trying to reach my IP?

Sorry haha, never heard of this program before.

ryderstorm - October 21, 2014, 10:35 pm

Good tutorial OP.

Been using Peer Block for a long time to ward off the RIAA and it does a lot of good blocking annoying ads too!

?

well then - October 21, 2014, 10:36 pm

(Oct 21, 2014 10:34 PM)Peppermint Butler Wrote: [\[CITE\]](#) Awesome!
Why does it say that all these Colleges are trying to reach my IP?

Sorry haha, never heard of this program before.I think it's usually when you torrent, and they look at it for research or something of that sort.

Peppermint Butler - October 21, 2014, 10:45 pm

(Oct 21, 2014 10:36 PM)J????????????????? Wrote: [\[CITE\]](#) I think it's usually when you torrent, and they look at it for research or something of that sort.

so should i have http enabled?

well then - October 21, 2014, 10:49 pm

(Oct 21, 2014 10:45 PM)Peppermint Butler Wrote: [\[CITE\]](#) so should i have http enabled?

I would advise no, since your websites will load very weirdly. I keep HTTP off. Works like a charm.

Redemption . - October 22, 2014, 9:35 am

Will this interfere with Ratting on a vpn?

well then - October 22, 2014, 8:11 pm

(Oct 22, 2014 09:35 AM)World Peace. Wrote: [\[CITE\]](#) Will this interfere with Ratting on a vpn?Not sure. If you're on a vpn regardless, I wouldn't think the person resolving you could utilize a vpn's IP.

Ren - October 22, 2014, 9:32 pm

Posting so I can remember to try it out when I'm back on PC thanks OP for this method!

Cyrus - October 22, 2014, 9:46 pm

Thanks for sharing OP - appreciated!

Griev?us - October 22, 2014, 9:47 pm

Thanks for the share J, going to be doing this tonight and see if I get any results from skype resolves.

Cyrus - October 22, 2014, 10:01 pm

Do you need to create a fresh Skype account too?

gunner05 - October 23, 2014, 4:44 am

thanks for this! i completely forgot about peerblock!

sophrosyne - October 23, 2014, 5:40 am

Glad to see someone else use this program as well. It can do more than this. It is a damn good program to have.

syntax - October 23, 2014, 11:09 am

Damn nice share OP gonna try this out in a bit....^_^

Trisomy 21 - October 23, 2014, 3:59 pm

(Oct 22, 2014 10:01 PM)Cyrus Wrote: [\[CITE\]](#) Do you need to create a fresh Skype account too? Some resolvers can get all previous ip addresses associated with a skype account, so if you don't want to be resolved, yes.

Aurora - October 23, 2014, 4:05 pm

Wow, this is quite new and different from the things I've seen. I will be sure to try this out.

well then - October 23, 2014, 9:53 pm

(Oct 23, 2014 04:05 PM).Sinister Wrote: [\[CITE\]](#) Wow, this is quite new and different from the things I've seen. I will be sure to try this out.

Thank you for the positive response(s).

powerbygood - October 23, 2014, 10:49 pm

Hmm... I ran peerblock, but I am still able to resolve myself with a skype resolver.

Linux™ - October 25, 2014, 6:05 am

This has already been done by Dexter, I think it's called the FireStarter method.

Reference: <https://hackforums.net/showthread.php?tid=3726185>

You're on a good start OP. However this is not copied, it is a remake of something that can already be found.

Zabuza? - October 25, 2014, 9:57 am

Yeah, I've thought about this in the past as well. Thanks for sharing the method, but by no means did you create it.

liam1uk - October 26, 2014, 2:19 pm

I've known about Peerblock for a long time now but didn't know it stopped resolvers. Correct me if im uncorrect but won't this also stop you from being online on steam?, i believe it does because whenever i used to run it while torrenting it would disconnect me from steam and i wouldn't be able to message my friends.

Well anyway thanks for this "Method" op i already kind of knew about it because of the steam thing i explained but i didn't know it would block resolvers on skype!. Thanks i will test this out when i am on my main pc later!.

MisterDB - October 27, 2014, 9:41 am

Just tried this and it was worth the little bit of time needed to set it up. Checked with 2 online skype resolvers and they both couldn't show my IP, thanks OP!

Jagster™ - October 27, 2014, 10:09 am

So it uses a list of "known bad computers" lol okay so if I use Wireshark probability of them blocking my machine is low... not the best method tbh.

Cyrus - October 27, 2014, 1:03 pm

I don't believe this method works, atleast not very well... ?

Mr Orange - October 28, 2014, 12:15 pm

I seem to be having trouble. I must not be doing something right. Here are my skype settings:

<https://gyazo.com/1137d8aa4972616d0e1d9e3b1e89079a>

What kind of trouble? Your Skype settings seem to be fine, mine are the same.
