Thread: [\[Cheap & Fast\] CPA/PPD Landing Page Creation Service + Fake APP \[HQ\]](#)

Not Available - October 22, 2014, 2:49 am

I'm still designing my thread design, be patient...

I'm only looking for people that are interested, don't PM me if you are not.

This simple Blogger LPs tend to have a REALLY good click through rate.
My CTR on CPAGrip is around 80% to 90% with the templates I make.

Here are two previews:LP 1 - [Click here](#)

LP 2 - [Click here](#) (This one is older and doesn't have all the visual features as the first one)

NOTE: After the LP is done and I send you the login info etc. you are still able to request additional support anytime you need it... Meaning, I offer free support to everyone. I can do additional changes to the LP but will charge \$0.50 for everything you want me to add.

I will be charging 5\$ per landing page and the payment has to be made upfront... I'm accepting PayPal and BTC (Preev rate).

I will also charge 2\$ for a custom fake app... You can send your own fake app to me if you want and I'll use it for the LP without charging anything for it.

Let me know if you are interested.

NO VOUCH COPIES WILL BE GIVEN. YOU CAN SEE THE SAMPLES ABOVE.

So you can "create" these Landing Pages but you're only able to work within wordpress and blogger?

What if I wanted to host them on my own webhost?

It is really easy to start wordpress, and you can make a lot of money with it too.

I can create Blogger LPs that are hosted on Blogger but you can still point a custom domain you bought to it.

I can also create WordPress LPs hosted on your own webhost with your own custom domain, but It'll cost more.

Hope this clarifies everything. Let me know if you want to know anything else.
