Thread: [Alcatraz Wing in Cinema 4D](#)

Originality - October 23, 2014, 7:05 am

I'm going to post my progress as I continue with this. So come back, I will continually update this until it is finished.

I will also speed art this!

Spoiler [\(Click to View\)](#)

More pictures of this project are here: <https://www.behance.net/wip/819109>

**Sorry for the large image, it comes off Behance.

You can see more of my 3D modeling here:

Nice work but for my opinion you need to make the bars smaller and the table legs looks weird...but because it's only WIP so 7/10,keep up the good work ?

Ya, that's the only things I would say to fix on but great work! Maybe add some more details in it? But overall 7.5/10 ?

Thanks for the advice guys! Yea, I'll definitely make the bars smaller. This is only a preliminary render without objects and such, so it's just the basics without any texturing!
