Thread: [\[Ressources\] OpenClassrooms, tons of free coding/programming tutorials](#)

**Aura** - October 23, 2014, 2:06 pm

Hey guys, Aura here.

So I was going through all my bookmarks, and I found an old one that used to be called "LeSiteDuZéro" (now OpenClassrooms). For the people that don't know what that website is, it's a website that contains tutorials, of every levels for every Computing domain there is, but a lot of them are programming/coding based. It helped me a lot when I started in programming/coding and I thought that I would share it with you guys. Here it is :

<http://fr.openclassrooms.com/>

Unfortunately, the website is in French only, despite you being able to change the language (in the top right corner), it stays in French for some reason. You can still translate the tutorials via the "traduction" feature of Google Chrome if you wish, since the examples will stay the same. I highly recommend using this website, if you prefer text tutorials with picture/screenshot examples instead of video tutorials like the ones on TheNewBoston.

Here's a few screenshots of how the website looks :

WARNING - LARGE SCREENSHOTS AHEAD

This reminds me of TeamTreeHouse.

TeamTreeHouse is really good for learning programming but unfortunately requires monthly payments.

I can confirm, this is a very useful website. It's where I learned the basics of PHP and C. The translation seems to be a work in progress, but apparently you can help them out (I'm looking into it ATM).

Another good french website is developpez.com, I prefer it over openclassrooms mainly for their newsletter and their lightweight yet intuitive interface.
