Thread: [Application Creation 101 | CREATE YOUR OWN SMARTPHONE APP | SUPER EASY | HQ APPS](#)

Veezon - October 24, 2014, 10:18 am

PM ME WITH ANY QUESTIONS ABOUT THIS E-BOOK!

VOUCHES / REVIEWS:

Spoiler ([Click to View](#))

(Oct 24, 2014 11:09 AM)thebigchicken Wrote: [\[CITE\]](#) Grammar ?????

Good grammar, little to no spelling errors

Originality ?????

I have used a handful of eBooks relating to this topic. I have heard of the resources used BUT not the method itself. Very original although if you have experience in app development you may already know about some parts of the eBook. But i'm sure that 90% of this eBook also applies to experienced app developers.

Ease Of Use ?????

This eBook is extremely easy to comprehend. I'm a visual learner myself and I find this very easy to understand with the detailed graphics. Doesn't have any prerequisites you will only need Time and effort.

Organization ?????

Clear structure and contains all the ingredients required to make a delicious eBook.

Overall ?????

Before Reading this eBook I wasn't positive if app development was for someone that is not experienced with coding like me. I was completely wrong, It is for absolutely anyone. It really does open your horizons and is the proof that anything is possible when you put your mind to it.

Good luck with the sales !---

(Oct 24, 2014 11:30 AM)Limited Edition Wrote: [\[CITE\]](#) Huge vouch for Ellis. I have been chatting with Ellis for many months now and have been watching the progress of his own app. He sent me a copy of his eBook to have a read over. I actually didn't understand how easy it would be to start creating apps until I read this. I have no language experience and wouldn't even know where to start if I wanted to make an app. This eBook provides all the tools you need to create an app with no skills or previous experience!

I bet you have seen new gaming apps pop up every day, something so simple in apple's top 100, these apps will be getting 1000's of downloads per day or even per hour. After reading the ebook I realise how easy it is to get started with no programming knowledge! All it takes is several apps to do 'ok' and I'll be a pretty wealthy guy or it will take 1 app to do very well and I'll become rich overnight.

I see a lot of HF members looking for the 'get rich quick' button and this is probably as close as you will get. You need no skills or prior programming knowledge to use this eBook. Just put some time and effort into your app even if it takes you all year to get it to your standards before release. You never know, your app would make you rich overnight.

I highly recommend this eBook, it doesn't just tell you what to do. It tells you all the basic controls and how to do things. Screen shots are included so anybody can follow!---

(Oct 25, 2014 11:10 AM)iPod™ Wrote: [\[CITE\]](#) Application Creation 101

Application Creation 101 is a 19 page e-book, including introduction.

Content

This ebook is information packed with pictures and step by step instructions. This ebook will teach you the basics of making your first app and where to find the resources to do so. The author has also explained what makes a good app that is both successful and profitable.

Ease of use

This method is extremely easy to use just by using the step by step instruction. Every step has its own picture and explanation on what to do next.

Originality

Honestly, there has been many ebooks on this topic but this is first that I have seen that includes how to make your first app. Many ebooks on this topic focuses on the money making part but not so much on the creation of the app.

Overall

I would definitely recommending buying this E-book, it does require some effort but it will pay-off.

9/10---

(Oct 25, 2014 03:39 PM)CDog420 Wrote: [\[CITE\]](#) I bought this E-Book and I was certainly impressed, the standard of this book is f*cking awesome and I have started creating my very own app right now. Probably wont release the first one to app store but I know exactly what the market wants and this E-Book has made me notice how successful apps became successful as well as teaching me how to make apps! Really, thanks OP!---

Grammar/Style - ?????

There were almost no spelling errors in this Ebook, and it was very easy to read because of the nice layout. It wasn't just a big wall of text, and that's what I really liked about this Ebook. The author did something to enhance your reading experience, and the colors he used were friendly for the eyes.

Content - ?????

There was a ton of content, and all of it was very useful and helped you on how to create your own application step-by-step.

Originality - ?????

I have never seen these methods before.

It has a unique method to help you get your app popular and high on the list.

Conclusion - ?????

The Ebook is very userfriendly and helps you step to step on how to create your own app and how to get your app popular.

(Oct 30, 2014 07:02 AM)Pro? Wrote: [\[CITE\]](#) I have received a vouch copy of this Ebook and I must say that this is the most HQ Ebook i saw on HF already.

I have heard of OP's app idea, and I must honestly say that I see potential in it.

OP's Application will be a huge success.

I wish you the best of luck with selling your Ebook and developing your application.

Kind regards,

Kenny ?---

"Learn how YOU can make the next BIG HIT on the App Store".

Do you have an app that was / is currently on the top 10, even top 100? - If not, you can't say this due to lack of experience.

Are you just going to link a site like appmonkey to make crappy web based apps?

No sales trashing intended.

Veezon - October 24, 2014, 11:34 am

I am currently developing an app right now that I believe will make it onto the top of the app store. Feel free to PM me with details about the app. It is finished for both Android and iOS, I am just fixing bugs before I release. The app is not a game by the way, it is a social networking app with a very unique but extremely useful idea. And I am not going to just link a site and make crappy web based apps. The E-Book is 19 pages long and includes screenshots.

Thanks guys for all the positive feedback on my E-Book.

phybe? Jr. - October 29, 2014, 2:46 pm

Do you have any reviews by more trusted/well known members? What can this give me that google cannot? What apps do you have in the top 100? I'm interested.

Veezon - October 29, 2014, 3:07 pm

(Oct 29, 2014 02:46 PM)phybe? Jr. Wrote: [\[CITE\]](#) Do you have any reviews by more trusted/well known members? What can this give me that google cannot? What apps do you have in the top 100? I'm interested.

I can guarantee you, as soon as I get my new apple developers license, I will. Right now, I have developed an app that I, as well as many others can bank their money on it being huge. The only problem I have right now is that I don't have the funds to get it out. I have to buy copyright, etc.

However, if you have ever seen the app "piano tiles", you will know that it is a success and my good friend is the owner and he is backing up my app that I have developed, telling me that it is going to be huge. The app is a social chat app where you can chat to friend but with an extremely unique feature that is very useful and the HF members I have told tell me that it is very promising and all believe that it will be massive. If you like, I can get the member "LiveSupport" to back me up, he is willing to pay for everything for me for a large percentage of the app since he also believes in it's potential.

In this E-Book, I not only tell you how to create your own app but exactly what the app store is looking for and what makes an app huge. What I have to offer that Google doesn't is my guidance when doing so, in the E-Book, I go more in depth than anything you can find on Google does, as well as offering my full support. It is really worth it, feel free to PM me.

If you really like, I can write a brand new E-Book for advanced people. Like I said, this is more aimed towards beginners but also has information that people in the field know. However, the only problem with doing that is you can't exactly make a cross platform application in one, you have to do them separate and I use another developer for Android.

However, I can teach people how to make one from scratch using Obj-C for iOS.

I wasn't really going for that, as I am a beginner myself. I just thought this was teaching how to make a successful app from scratch. It sounds like a good book, but I never buy ebooks.

I think I've only bought 2, ever, and only because the seller brought the price down real low. I'm just not ready to drop \$20 on a 700kb pdf that I don't even know if it will work at all.

Veezon - October 30, 2014, 7:45 pm
