Thread: [AtlirVPN Release Contest | 5 3 Month winners | 2 Lifetime winner | \\$15 Cash Prize](#)

Carl Elias - October 24, 2014, 11:55 am

To celebrate the release of AtlirVPN (<https://hackforums.net/showthread.php?tid=4502656>), we have decided to hold a contest to give away a total of 7 accounts! We will be giving away FIVE 3 month accounts (\$12 Each), and 2 Lifetime Accounts (\$23 Each). In addition, we will have ONE winner of a \$15 cash prize (If we get 30 to enter)!!!

To enter is fairly simple. Just change your signature and post here so I know you were entered. You must wear the signature 2 weeks starting from when you post. We will keep track. Once we reach 20 members in the contest, we will allow for everyone to have worn the Signature for 2 weeks. After this time, we will draw 7 random users using Random.org

First 2 Numbers picked -> Lifetime

Next 5 Numbers Picked -> 3 Month

Last Number Picked -> \$15 (Only if we get 30 members to participate)

Just an update here as well! This contest will stay open until we get a winner. I will make the number though 20 now instead, but would need to remove the \$15 reward to compensate. If we hit 20, I will increase it as more come in until we hit 30, at this point I can re-add the \$15 prize.

The VPN now also has port forwarding enabled, so if that is what you were waiting for, now you got it!!

Hello,

first of all I enjoy using your service and would recommend it to everyone but I have one issue. I get random disconnections after being inactive online. It happens when I read an article without any browsing. I need to connect again. Is there any option to prevent disconnecting due inactivity? Thanks

And also, will Romania server will ever be online?

You need to add a line to the the configs settings to fix this issue. It disconnects users after one hour. Pm me for support, we did fix this issue
