JumpWar - October 25, 2014, 1:18 pm

Hi, maybe you can help me with a problem I neglected for some time now but need fixed for a theme I am building.

I want to display the last posters avatar.

My approach here is to create a variable holding the link to the avatar. As those links are saved in the users table I added the following code to "forumdisplay.php" on line 1257 shortly after \$lastposter and \$lastposteruid are defined.

```
Code $query = $db->simple_select('users', 'avatar', "uid = $lastposteruid");
$result = $db->fetch_array($query);
$lastposter_avatar = $result['avatar'];
```

My assumption is that I can now use
Code `` in my template to display the last posters avatar.

This however does not work as I expect it to. How would I go about this?

And whats the best practice for adding variables? (Maybe you can turn that into a tut one day)

Would appreciate you help on this :)

(Oct 25, 2014 01:18 PM)JumpWar Wrote: [\[CITE\]](#) Code \$query = \$db->simple_select('users', 'avatar', "uid = \$lastposteruid");

```
$result = $db->fetch_array($query);
$lastposter_avatar = $result['avatar'];
```

Quote:\$query = \$db->simple_select('users', 'avatar', "uid = \$lastposteruid");
change to

Quote:\$query = \$db->simple_select('users', 'avatar', "`uid` = '\$lastposteruid'");
They make a difference.

Hi, thanks for the reply ?

Implemented your suggestion but didn't change anything as far as I can see. Also have no idea how to debug this properly.

Could you link me a source about using ` in queries? would like to learn more about that not sure which subject this would fall under.

Currently only have it on a local server. What would you want to look at?

The displayed forum just has an img tag with an empty src, would you want to see the templates?

(Nov 3, 2014 03:17 PM)Red™ Wrote: [\[CITE\]](#) What on screen instructions are you talking about?
You said you got this error.

Quote:SQL Error:

1054 - Unknown column 'awards' in 'field list'

Query:

UPDATE grandf_users SET awards=awards+1 WHERE uid='3'

Go to your database and look for the table and check all is in order.

Red™ - November 3, 2014, 2:21 pm

Go to your database and look for the table and check all is in order.
From what I know, the awards database or field list is missing.

Nasyr - November 3, 2014, 2:23 pm

I've made a quick tutorial for it - <https://hackforums.net/showthread.php?tid=4522024>

Red™ - November 4, 2014, 7:19 pm

You should add some links to some tutorials for answers of most frequent asked questions in the OP. Just a suggestion for your help desk :D

I like that idea, when I'm back on my pc tomorrow I'll run up a list of errors and such.
