Thread: [New 3P1C Feature](#)

Omniscient - October 25, 2014, 10:12 pm

I have added new feature for 3P1C.

1. All 3P1C have a 5 second search flood time vs the standard 25 seconds.
2. All 3P1C Ub3r have a 1 second flood time for posting and sending PMs. You must be both 3P1C and Ub3r for this feature. Abuse of this feature to spam will result in a closed account.

Enjoy.

b?xxy - October 25, 2014, 10:12 pm

YES FINALLY!

Thank you for adding this Omni :D

Griev?us - October 25, 2014, 10:12 pm

Oh lawdy, I gotta get this now because of the the second feature.

I hate the send times so this will help a lot.

Paranoid? - October 25, 2014, 10:13 pm

Amazing feature, I'll definitely be purchasing 3P1C soon.

SIM-1166170 - October 25, 2014, 10:13 pm

Wonderful Omni, thanks for this. ?

Rote - October 25, 2014, 10:13 pm

Thanks so much for this omni.

Glad to see more feature being added to this usergroup!

Tonight - October 25, 2014, 10:13 pm

actually something ive been waiting on :^)

Vivicore - October 25, 2014, 10:13 pm

Is 3P1C still available?

How can I get it?

Sorry if I'm being a noobie.

Roger Waters - October 25, 2014, 10:13 pm

These features will be incredibly useful for a ton of people. I'm glad to finally have these features.

Tony Stark - October 25, 2014, 10:14 pm

This is bloody marvelous. Finally!

A lot of members will be appreciative of this change.

You've been quiet, must be busy making changes. ?

Thank you.

Eddie - October 25, 2014, 10:16 pm

This is a nice feature Omni. Thank you.

Gratitude - October 25, 2014, 10:16 pm

Damn. I should've bought 3P1C when it was cheap...

Oyus!

Praise the lord, Omni for bestowing a wondrous gift upon us.

b?xxy - October 25, 2014, 10:18 pm

I'm confused, I tested the 1 second PM flood thing, and it still says I have to wait 25 seconds.

Did I read this wrong?

This is gonna be really helpful for when I wake up to a billion PMs.

Omniscient - October 25, 2014, 10:26 pm

Boost my OMC prices again, thanks Omni.

Anyway, good too see some useful features.

Omniscient - October 25, 2014, 10:28 pm

Just a typo. Try now. To test you can send PMs to yourself.

Probably going to increase 3P1C price again soon too. Gonna rebuild the upgrade system asap.

You have no idea on how much I love you right now ... For someone like me who have to answer every threads in many sections back to back, this is a real relief for me. Same for the PMs since I receive dozens of them daily, most of them back to back and I have to answer them fast before leaving to school.

Fresh - October 25, 2014, 11:04 pm

That feature is definitely worth the \$10 bucks I paid for 3P1C

ven0m - October 26, 2014, 12:03 am

3P1C Ub3r with this epic feature. ?

Autocorrect - October 26, 2014, 12:03 am

And with that, up goes the demand of OMC.

Oak - October 26, 2014, 12:08 am

Perhaps since you've added the lower flood time and already figured out the combination of Ub3r + 3P1C required, you'd give [more PM recipients](#) another consideration? If not, ahh well, but I'm glad to see these! Can't wait to see what's all left in store for 3P1C, I'll definitely be making good use of the lessened search flood time.

l33t has a lot of useful features. It's still an upgrade, but it makes sense to offer things to Ub3r, and Ub3r + 3p1c even more since this has a lot of potential abuse for spamming, but I'd assume an Ub3r 3p1c has something to lose instead of wasting his time spamming every second, then getting closed.

Mr. WAVES - October 26, 2014, 10:31 am

search flood means the seconds you have to wait between searches?

I'm epic and I have to wait 25 seconds.

Sorry, but you can only perform one search every 25 seconds. Please wait another 10 seconds before attempting to search again.

Robust - October 26, 2014, 10:41 am

I think you're missing a hook on thread searching too, if that's intended to have the 5 second time. It's fine everywhere else as far as I can see. It's the search thread feature on the bottom of each thread, still has a 25 second limit.

Being someone who actually has relied on others (due to my lack of knowledge in SEO, internet marketing, graphics, etc) I can happily tell you that most people I work with are either lazy, or not smart enough. Most who are capable are very lazy and won't do anything. I've had so many partnerships and honestly there's a lot of slacking involved. Being able to work yourself is very important. Being capable of doing stuff yourself is very important. Honestly, being so pissed off I decided just to learn it all myself, even if it takes a while (excluding graphics, I'll never get good at that), because once I know my way around it, I won't have to wait for bullshit.

I can guarantee if you rely on others for stuff here, stuff will get done much slower. It's good you're capable of doing all of this.

Unless you can find someone who isn't lazy and won't slack, and puts in as much effort as you (which I only found a few times in all of my partnerships) you're better working alone, and it will pay off when it's big and you take 100%.

Omniscient - October 26, 2014, 12:12 pm

My experience in that as well. Even worse if you rely on them and aren't knowledgeable enough to know what to tell them and manage your help. Hard to know that coding a script takes X days when you've never coded one before. I just started learning a lot of stuff before everyone else. I'm just ahead of the curve in that regard. I do feel like I'm falling behind when it comes to HTML5 though. Trying now to catch up. I'd love to rebuild HF 2.0 as HTML5 with a real snazzy interface using MyBB 1.8.

From academic experience, I can't trust people to do a good job and I end up being the babysitter. If you want something done right, you gotta do it yourself. Knowledge is free.

I'd like to see anyone post faster than 1 post per 30 seconds. Anyone posting 1 post per 30 seconds is going to have low quality posts anyway. 1 second or 30 seconds won't matter then.

Anyone who can read a thread/post and reply within 30 seconds continuously is a low quality spammer. For PMs it's freaking great. If 10 people PMs me and wants to buy from me, it takes me under 30 seconds to reply with all they need (copy-paste). Before it would have taken me at least 300 seconds (10*30 = 300 seconds / 5 minutes).

I might post a concept video if anyone is interested in this software (~:.

I'm actually developing this software myself c:, just for fun.

An example of this in real world scenario would be scanning for a question, check if it has been quoted or if it's new (means it's not a troll post and worth to be replied to), and then generate a response similar to the people who quoted it by using a rewording engine.

This is my script in action, it came up with this by itself, not a reply to a question but still.

That could have been done anyways. Just set the bot to post every 30 seconds to avoid flood limit.

Bot posting isn't anything new either.

And trust me, someone here would report it. If people can weed out ban evaders based on posts they can figure out a bot is posting.

Quote:Omni profits off OMC.

I've lost about \$1500 so far with OMC. That's actual money I put into the project so far. I've not made a dime. I'm paying for servers and I've bought OMC with BTC at Allcrypt. I've not sold any of my OMC holdings and likely won't for a very long time. Every upgrade to 3p1c with OMC is profit lost. Example is there are 700 3p1c upgraded members. At a \$10 price I could have earned \$7k if I set it up for BTC or PP. Instead I have a wallet of OMC that's not even worth \$6k total and there is no larger market for me to sell that many. I'd be lucky to get \$2k trying to sell them all.

I'm not really supporting OMC for the money. I'm doing it as an experiment and to learn.

That's a pretty simple task. Anyone with under 20 posts that refers to you as 'Omni' is likely a ban evader. That's what I see a lot. Anyone with too little posts and too little knowledge I'd consider to possibly be a ban evader, just my initial thoughts.
