Thread: [Spoiler, inside the spoiler.](#)

b?xxy - October 26, 2014, 7:33 pm

I did some searching, and found that this surprisingly either hasn't been suggested before, or has been deleted.

What do you guys think about being able to put spoilers, inside spoilers?

Pillows - October 26, 2014, 7:34 pm

No. That would just lead to a shitton of trolling and serves no real purpose.

Actually, it could easily serve many purposes.

There could be a limit to this though.

Spoiler [\(Click to View\)](#)i find it having no use whatsoever

Chance Acid Rapper - October 26, 2014, 7:37 pm

I could see it having a use, such as if a user wanted to post a a group of pictures, one spoiler, then more spoilers inside to separate the groups more accurately. If that makes sense...

That's actually the thing that made me want this idea to be implemented.

Spoiler [\(Click to View\)](#)Well...Spoiler [\(Click to View\)](#)You mean like this? wow [\(Click to View\)](#)You can already do it

Perhaps that answers your question?

Spoiler [\(Click to View\)](#)Oh!Spoiler [\(Click to View\)](#)I forgot you could do this by using different tags.

Roger Waters - October 26, 2014, 7:41 pm

You can alternate the [sp] and [spoiler] tags.

Example:

Spoiler [\(Click to View\)](#)

This is a spoiler

Spoiler [\(Click to View\)](#)

This is another spoiler

Spoiler [\(Click to View\)](#)

This is yet another spoiler

However, abuse of this could result in a warning for Low Quality Posting. Use it wisely.

Yeah.

OP, just use a combination of [spoiler] and [sp] to do it.

PiraX - *October 26, 2014, 7:42 pm*

Spoiler [\(Click to View\)](#)? Spoiler [\(Click to View\)](#)?

You can already do this. What's the problem?

b?xxy - *October 26, 2014, 7:44 pm*

Thank you so much for showing me how to do this you funny little trolls.

/Thread.

I actually removed the ability but I guess the rotation of SP and Spoiler tags screwed it up. Oh well. You get what you wished for.
