Thread: [KMART Receipt PSD Fully Editable](#)

jeremykonst - October 27, 2014, 6:32 am

Below is a Kmart receipt .PSD that I have had saved and used many times on multiple occasions. I hope you find it useful, enjoy.
I do not know it's original origin so am unable to give credit (I'm sure I found it on some forum some time ago)
Here is a screenshot of the receipt open in photoshop.

If you plan on using this, make sure you do a rasterization and be sure to blur and warp the text to fit the wrinkles of the paper.

P.S. I also have many other receipt .psd's saved on my computer over time if anyone is interested I will share them.

Hey Jeremy - how do I get a download link to this receipt / your other receipts? I am seeking it for a design project. Would be interested in checking out your receipt templates. Thanks
