Make a youtube video about "LoL rp hack" or "Runescape money adder" and include link to virus in description. Wait few hours and you should have some slaves :)

For starts, make sure your file is FUD before you try to infect anyone.

I was going to start selling bots but sadly never got the reputation to start one, I have an okay spreading method getting 60 bots per day minimum.

If you're still interested in getting slaves feel free to PM me. ?
