Syracusia - October 27, 2014, 12:50 pm

Hey everyone I am currently developing a crypter and will be posting tons of updates to the software.

I am giving this software out for free (for now) and would love to take any suggestions you guys have for the software.

I can custom code almost any feature into the crypter.

This crypter was designed to be simple, easy to use, and most importantly FREE ?

Here is a download link to v5: <http://ge.tt/4Ned2q22/v/0?c>

Update Log:

Added File Binder

Added New Unique Stub: "v5"

Added Icon Support

Please leave support on the thread to keep me going and adding new updates it really makes a difference! ?

butwhatif - October 27, 2014, 12:52 pm

No pictures, -14 rep, no virus scan...
NOPE.

NOPE.

These are basic functions you can perform yourself I am already giving the crypter for free do I need to spoon feed you as well?

Anyway I will do so for the sake improving the quality of this thread but please learn how to be a mature member of this forum ?

Also I have more positive rep than negative rep, if you would take a look I just get gang repped by jealous kids

Nope more negative rep then positive, anyway it is what almost every member wants to see. Pictures are spoonfeeding? Nope, if you are going to buy a program then you also want pictures before you're going to buy it. Same with shoes, television and allot more. Anyway if you are to lazy to even do those things then why did you even release this crypter? Btw here is a virus scan for you <https://nodistribute.com/result/Ou6PBmF7x85Har> being lazy does not help.

TonyTonyChopper - October 27, 2014, 1:17 pm

This is super sketch, someone with more time should post virus scans and such.

--edit--

thanks guy above me for the scan.

User above just scanned 0/34.

I know amazing opportunities like this do seem sketchy, but this one is indeed real ?

Please leave crypter suggestions.

I am currently working on making it more fud atm. ?

Kids like you are what breaks HF community apart with your bull shit.

IF YOU ARE GOING TO MAKE A CLAIM FUCKING PROVE IT
FOR ENCRYPTING FILES ONLY NO MALICIOUS USE IS ALLOWED

Sorry was updating the stubs, crypter back online and updated.

v10 coming out tonight!!!!!!

Yup unlike other crypters I use a cloud based system to keep your software stubs updated and secured from AVs crawling them ?

Also I am not sure why it doesn't show up do you have .NET? ?

I have .NET Framework 4.5.2 installed on my system and running. Everything is in perfect condition, top notch. So what's the issue ?

Also, people are free to use VirusTotal since there's some of us who are actually White Hat and wants to share malware samples with Antivirus vendors to create more efficient products.

Nothig works, I don't believe the cloud bullshit for a second. There are better ways to get your point across rather than flaming everyone. Definitely a LQ member and your reputation certainly reflects that.

You're a fucking idiot the stubs are 100% in the cloud that's why when my website is down the crypter doesn't work you fucking idiot.

Try thinking for yourself for once mate because you are a dumb mother fucker ?

If you would read the thread it is obvious I am doing work on the website so the crypter of course won't fucking work.

Why do you think there is stub ID?

Why do you think you don't have to download any stubs?

Fucking idiot hop the fuck off with your unintelligent god damn bullshit and never download or use any of my FREE services in your life.

Fucking ungrateful piece of shit

I know you see you have your own crypter lol, worst way to advertise your shit buddy.

Also, the virus scans and the lack of screenshots (even though you said on multiple occasions that you would post screenshots) slightly gives away the fact that your 'program' is a stub.

Maybe try to bind a UI to the stub next time? Or even bind Aegis to it?

It doesn't. He's promised screenshots, virus scans, etc etc, but it never happens. The virus scans posted on here prove that it is infected.

Syracusia - December 30, 2014, 1:44 pm

LOL it's definitely not and infected and definitely does work, it's just not FUD at all by now

I don't really care if you do or do not, but I am going to ask out of curiosity. Why do you keep posting that it has a virus? It clearly does not. Even if you don't like the stresser we have seen your dozens of posts.

It does work and it isn't a virus. Please quit spamming the forums my friend.

Or continue I don't care ?

Framez1 - January 2, 2015, 6:30 am

No pictures, -14 rep, no virus scan...
NOPE.

It's not a "stresser" it's a "crypter" *cough*virus*cough*.
Post some screen shots, look at the amount of people who KNOW it's a virus.

You're exactly the reason why crypters don't stay fully undetected - because you do shit like this. At least first try to grasp the basic fundamentals of this before actually doing it.

testkroket - April 13, 2015, 1:24 pm

Omg what a moran.
And there went a good crypter...

msw3006 - April 13, 2015, 3:43 pm

Sry at the time i was a noob lol i del it old post
