Thread: [Express theme \[7 controls\]](#)

Naywyn - October 27, 2014, 3:25 pm

Hello, here is my new mixed theme, called 'Express'.
Credits goes to Aeonhack, Leumonic and iSynthesis.

Pastebin link :

I will strongly recommend making your own theme, if you still are new to gdi i recommend starting with a theme as a template and get the basics down, its addicting after a while in my own opinion, great job try making another, I would sure enjoy seeing it!

I've mixed a few themes as well & changes colors, dimensions, fonts, etc.. and I have one that I'm using in a current project of mine. I haven't released the remix yet though cuz I thought users on HF frowned upon it... maybe I will? Good job though :)
