Shadow Reign - *October 27, 2014, 4:56 pm*

I am now releasing a test version of the Shadow Reign Virus Builder.

This is to gain feedback from users to see if they like it and what features I should add. Not all of it is functional, but most of it is.

Remember this is a test version!!

It is a virus creation tool so I suppose you should expect a few false positives but feel free to disassemble it if you're paranoid.

Thank you for the share! I will try it out now.

Vextoray - *October 27, 2014, 5:24 pm*

Please put your virus scan in a spoiler :P

Simply™ - *October 27, 2014, 5:26 pm*

Put it in a spoilerrrr bro. Why infect people with viruses when you can use RATs and kls?

If i remember right... the Gen:Heur.Bodegun detection must be the assembly. Try removing the word 'stub' from the root namespace of the main solution and leave the assembly default.
