Thread: [\[Tool Kit\]Hackers tool kit.Great for new comers](#)

Shiroe - October 27, 2014, 8:25 pm

Well top of the day HF!! I have put a lot of thought and seen a few new members having a few issues with finding what they need to begin hacking with. With that said I have made a small tool kit that new members can use or if you need some quick tools you can get them here.

R.A.T's
Key loggers
SQLI tools
Tor
Shell booter with working shells+ shell checker
Binders
....And a whole lot more.

Notes:

The virus scan shows a lot of virus. This is false and these tools are all around HF and if you don't believe me run in VM for all I care.

These tools are not mine I have simply made a small pack for users. This is version 1. I will be making 5 versions and they will be bigger and bigger.

Virus

scan:<https://www.virustotal.com/en/file/697b56610cfb2f2f5bcd48ea6b6332f6a17b6829562a262c15c13d9c692d9cf3/analysis/1414462845/>

Download: PM or post here

EDIT: <http://www.mediafire.com/download/r3v9rm1423i2k9d/Hacker+Tool+kit.zip> if you guys start to leech again I will take it down

Again these programs are safe to use fully tested. Only reason why the virus scan shows as infected is that these are Hacking tools.?

tehninjamaster - October 27, 2014, 9:24 pm

Vouch! thanks mate! They work like a charm!

Shiroe - October 28, 2014, 1:53 am
