Thread: [cannot find win32...](#)

MR.ALT3N3N - October 28, 2014, 3:23 am

hello all :)

how are you i hope you good and fine :)

its me Mr.#

i have problem with setup kali on my windows

when i click the setup

its giving this error

cannot find win32.loader.ini

?

what is the problem

i'm use win 7 and i wanna use kali too in my computer

like windows 7 and ubuntu

tisla - October 28, 2014, 3:55 am

install on VMware. its better than making it your OS

MR.ALT3N3N - October 28, 2014, 8:59 am

when i instal it in vmware its giving some big shifts errors

like x64 errors bios erros.. i really cant play with my pc bios so ... :(

Rosetti - October 28, 2014, 4:34 pm

Have you tried to you Virtual Box? Its similar to VMware except made by Oracle.

x34c - October 29, 2014, 12:42 am

Download virtual box, download correct kali(64/32bit) if you havn't already..

Boot it up and if you get a error, you need to go into settings and enable the CPU option.

MR.ALT3N3N - October 30, 2014, 12:11 am

guys its say this karnel requirs 86/64 cpu ...

wtf ??????

how to enable the cpu

x34c - October 30, 2014, 4:35 am

Did you download the 64bit and you have a 32bit cpu? -.-

If not try..

Settings>System>Processor>Enable PAE/NX
