Hello there ! this is my first theme ! it contains only 4 controls for the moment.

Here is a little preview of what you can do :

Here is the theme :

Seems like you're off to a good start. Keep going and improving upon it. This has the potential to be a great theme. Good luck! :)

looks nice, glad too see that your trying to recreate some controls from other applications, keep up the great work!

I don't know why people here kept using GDI when everyone knows WPF is much easy and way better?

BTW, this one looks good. The font is actually different from the original. Adding a little triange before the Ultimate would make it more the same as the original
