Thread: [\[FUD\] iSpy Keylogger Preview | Stealers | RuneScape Pinlogger | Webpanel](#)

Malware? - October 28, 2014, 6:40 pm

I have been working on this project HackForums. I would like to hear your input if any features are wanted in addition.

This keylogger records keystrokes and uploads them to a webpanel. The user is able to log into the webpanel and view the logs. The webpanel is on my offshore hosting so you do not have to worry about buying a server. Since the file is on a webpanel the keylogger can never be whailed because user credentials are not in the output like an e-mail or ftp keylogger. The output is heavily obfuscated as well, invisible variables and more if decompiled in software such as reflector.

The builder and output both have .NET 2.0 dependencies.
The output is compiled on a remote server to prevent cracking.
The RuneScape Pinlogger only works for Oldschool Runescape

Please provide any input on what you think about this software.
Thank you.

Here is the virus scan, FUD (0/34).

[Virus Scan Result](#)

Photos in spoiler (large). Very slick web panel GUI.

Spoiler [\(Click to View\)](#)

Razza™ - October 29, 2014, 9:20 am

I'm helping out Venomous with this project, I would also like to hear the community's input.

?u??? Code - October 29, 2014, 11:25 am

Looks pretty slick. Adding a simple binder for the likes of .jpg etc. would be really good.

Aristocles - October 29, 2014, 12:50 pm

Your GUI is basic, your options are basics, are the virusscan is a fake one (22 KB for a keylogger made in .NET, cm'on mate)

Malware? - October 29, 2014, 2:13 pm

(Oct 29, 2014 12:50 PM)N?etzsche Wrote: [\[CITE\]](#) Your GUI is basic, your options are basics, are the virusscan is a fake one (22 KB for a keylogger made in .NET, cm'on mate)

Virus Scan is real lol, there are not stealers in that bin. The keylogger is definitely FUD. I think I had it at around 18kb before I added some extra functions. Do you have any advice?

Hire - October 29, 2014, 2:14 pm

Looks nice, Goodluck with the project. Kinda interested :P

Malware? - October 29, 2014, 5:25 pm

Thanks, I will keep this thread updated.

Vivicore - October 29, 2014, 5:26 pm

Looks promising.

Good luck with this buddy.

Disconnect.Me - October 29, 2014, 7:54 pm

Man been waiting ages for that RS pinlogger.

Thanks man

TerminalOne - October 29, 2014, 11:29 pm

Looks very sexy

Good luck OP with this keylogger

Redemption . - October 29, 2014, 11:35 pm

Posting to watch thread goo luck with project

Razza™ - October 30, 2014, 6:27 am

(Oct 29, 2014 12:50 PM)N?etzsche Wrote: [\[CITE\]](#) Your GUI is basic, your options are basics, are the virusscan is a fake one (22 KB for a keylogger made in .NET, cm'on mate)

The GUI may be basic, but that isn't where users will be spending most of their time. More options will be added over time, but we don't just C+P our functions, each is custom coded so obviously it takes longer and I can assure you that our web panel is the most advanced you've seen.

Trojja - October 30, 2014, 2:58 pm

Very nice work, looking good !!

Keep up the nice work

Malware? - October 31, 2014, 12:20 pm

Anyone have any tips on what they like the interface to look like?

Redemption . - October 31, 2014, 6:59 pm

I suggest adding a small color tint to the background and perhaps a small logo that's says "ISpy" I think that would be alright.

Malware? - November 1, 2014, 10:28 am

Pinlogger is now completed. Tested many times without flaws, even going super quick on pins. Low mem usage and no problems. Still in beta so there could be errors but it uploaded no problem.

Also if you click the pin image in the panel it enlarges

Beta project is now finished. Just need to buy servers to host webpanel!

Just completely finished compile server!

Redemption . - November 2, 2014, 7:25 am

Been talking to Venomous Net on skype. Very nice person. Saw some screenshot of this product and its just flawless. Good job with this OP

zorovoltage - November 2, 2014, 7:36 am

Hey nice job When do you think this will be out and how much do you think it will cost?

Malware? - November 2, 2014, 9:03 am

(Nov 2, 2014 08:36 AM)zorovoltage Wrote: [\[CITE\]](#) Hey nice job When do you think this will be out and how much do you think it will cost?

It is finished now and for beta probably like 8\$/mo and when it is not in beta it will be 15\$/mo

Yoolyz - November 2, 2014, 9:04 am

Wow, looks very promising.

Cant wait for this to come out!

- Yoolyz

i1995i - November 2, 2014, 9:46 am

Seems like a nice GUI. I like that. PM me. I want to plan something.

Malware? - November 2, 2014, 5:35 pm

(Nov 2, 2014 10:46 AM)i1995i Wrote: [\[CITE\]](#) Seems like a nice GUI. I like that. PM me. I want to plan something.

You do not have enough posts to reply.

Also I just finished custom dynamic string encryption

1337 - November 2, 2014, 8:37 pm

Looks very sexy

Good luck OP with this keylogger

Malware? - November 3, 2014, 12:34 pm

Sold first copy today, servers are being bought. Will be released officially soon

cooldav99 - November 3, 2014, 1:29 pm

I want this, please pm me as soon as it comes out. I would also like to test this out so if you need anyone, Im your man! Can't pm yet but im working on it

0xfd - November 3, 2014, 1:38 pm

Looks nice, Goodluck with the project.
thanks man.

1Shot - November 3, 2014, 1:39 pm

Hey nice work man! Good luck with your project.

TehLunat1C - November 3, 2014, 1:58 pm

Nice work dude,keep it up and good luck with the project ;)

-TehLunat1C

Malware? - November 3, 2014, 2:06 pm

All the servers for hosting/compiling have been purchased.

They are in the process of being setup!

fancy - November 4, 2014, 11:37 pm

nice work dude. release date for this nice tools..

blizzarz - November 5, 2014, 12:07 am

Hey, this looks really great. Passwords recovery works for all versions of chrome/firefox? And please tell me, how OldRunescape pin works? Makes screenshot or just numbers will come into email? Does it come with another keystrokes or different mail? And please tell me, if I create password recovery, oldrs pin etc will I get 1 file or 2? One with keylogger and second with rs pin recovery?

Razza™ - November 5, 2014, 4:45 am

(Nov 5, 2014 01:07 AM)blizzarz Wrote: [\[CITE\]](#) Hey, this looks really great. Passwords recovery works for all versions of chrome/firefox? And please tell me, how OldRunescape pin works? One with keylogger and second with rs pin recovery?

Venomous will be able to give you more information on the password recoveries when he get's on. Keylogger/Stealer/Pinlogger logs have their own page/table like so:

Spoiler [\(Click to View\)](#)

There will be an option to forward all of the logs to your email. The good thing about the panel forwarding the logs is that you don't need to build a new stub to change the email you want them sending to, simply change it on the panel.

The pinlogger sends images of each click, from testing it, we have seen that it is flawless. You will receive a log like this:

Spoiler [\(Click to View\)](#)

Clicking any image will enlarge it using a modal like this

Spoiler [\(Click to View\)](#)

The number that you don't see on the pin dialog is the number that has been clicked.

blizzarz - November 5, 2014, 8:24 am

Got it. I just wish to know one more thing, if 1 stub is for pin logger and key&stealer. Or will I have to make two separate stub one for pin logger and second for key&stealer and bind them.

Razza™ - November 5, 2014, 8:33 am

(Nov 5, 2014 09:24 AM)blizzarz Wrote: [\[CITE\]](#) Got it. I just wish to know one more thing, if 1 stub is for pin logger and key&stealer. Or will I have to make two separate stub one for pin logger and second for key&stealer and bind them.

Everything is built into one stub with iSpy keylogger.

zorovoltage - November 5, 2014, 5:09 pm

Mateeee when will this be out :D i can't wait..

Malware? - November 5, 2014, 8:10 pm

iSpy Keylogger V1.0 is completed and ready for marketing. The sales thread is being developed. If you would like to purchase in the mean time, contact me or Razza.

SaTan-INK - November 5, 2014, 8:22 pm

it looks really nice guys , be sure you did a good job with it ;)

Redemption . - November 5, 2014, 9:30 pm

I got a little sneak peek at this amazing piece of software and I must say. @Razza and @Venomous NET, I believe you two may have rose the bar on this section because the features I have seen, and the security to protect the software is outstanding. Bravo to you both. I will be in touch.

Regards,

World Peace.

sprk008 - November 6, 2014, 3:31 am

PM the password, wanna see how good it is :)

Malware? - November 6, 2014, 4:33 pm

I am currently re writing the GUI, and improving some functions.

iSpy Keylogger is finished for version 1.0

Meowth - November 6, 2014, 4:35 pm

Looks like something I may be interested in, I may contact you regarding this in the future.

joker7 - November 6, 2014, 4:41 pm

good luck with this...i will contact you later xD .

Malware? - November 6, 2014, 5:50 pm

Designing a new interface.

Redemption . - November 6, 2014, 6:38 pm

Nice addition to iSpy If i say so myself. Excellent work. Keep it up.

Regards,

World Peace.

George Bin Laden - November 9, 2014, 12:53 pm

Oh wow this keylogger is the perfect keylogger for me. It seems that this keylogger works for RS which is my number 1 reason. Is this keylogger free, i hope it is as i cannot pay. Excellent keylogger :)

Thanks :)

hacker666 - November 9, 2014, 7:33 pm

Bookmark'd. Goodluck on this project Venomous!

Redeemz - November 9, 2014, 8:26 pm

Just wanted to also comment here and agree that 22kb is a very standard file size for a bin these days in .net.

IP Lookup - November 9, 2014, 8:30 pm

Looks nice man, I'd like to have this thing ?

Scriptful - November 9, 2014, 9:16 pm

Wow, Th web panel looks amazing and simple.

Good Luck, Looks good.

Malware? - November 10, 2014, 7:29 am

(Nov 9, 2014 09:26 PM)Being Creative Wrote: [\[CITE\]](#) Just wanted to also comment here and agree that 22kb is a very standard file size for a bin these days in .net.

After redesigning the keylogger and I'm going to be adding a lot of features it is not going to be near 22kb anymore haha

Justas26 - November 10, 2014, 8:20 am

Well it looks cool and simple so i recommend you too start selling copies ;)

ffsagain - November 11, 2014, 6:22 am

Product seems like a gift from above for the non compos mentis(me). It is legal to send employees(thieves) keyloggers as long as it is in the T&C, which it is.

If I want to add the keylogger to an email attachment(employee updates) would I need to use batch software or whatever? Or do I have to get them to redirect to your panel to download?

I assume mass spammers/phishers/herders will be making it un-FUD soon! So would using a crypter as well be pointless?

In the settings.

Do I have to have the fake message appear or can it install "silently"?

Installation, Is that the keylogger or is that if you want to install another .exe also?

Icon, if I click folder option. Does that mean I can then batch with what I want to send my employees, so it will appear as a folder for downloading in the email?

Sorry for not pming but I figured you must get similar noob pms but the ton.

Malware? - November 11, 2014, 10:43 am

This file can be sent as a attachment and if you click the folder icon it still is an executable just the icon looks different. I would reccomend a good crypter for best runtime results

Razza™ - November 11, 2014, 8:58 pm

Venom has now wrote the core for V2 of iSpy and it's more stable than ever. iSpy can now recover passwords from every browser & version.

bewik - November 12, 2014, 2:29 am

sir can I get this keylogger? thanks in advance

fingers794 - November 13, 2014, 3:01 am

How do i purchase a copy of the product?...i do not have enough posts to send a PM ..thanks

Xeonph - November 13, 2014, 12:01 pm

Looks great.

How can we get hold of this keylogger? Or is it not yet released?

Jelkedb - November 18, 2014, 3:07 pm

Looking very good! I am very interested in buying this!

Malware? - November 20, 2014, 8:45 am

recovering from an illness, ispy v2.0, a lot of bugs fixed and every browser stealer added, re-wrote the core, extremely stable now! will be finished within 10 days.

Jelkedb - November 22, 2014, 7:45 am

Hope you'll get better soon. I'll have an eye on this thread. You are doing great work man! :)

Cheers

ds_lite - November 22, 2014, 8:52 am

Good job I'm Very interested in this SW ;)

iNadav - November 22, 2014, 9:29 am

Hey, Nice work and thank you so much for sharing it with us!

I have a little question, how is the keylogger this software would build exactly communicate with my web panel? Isn't that requiring servers? I'm just a newbie so that's kind of interesting, answer if you have some free time :)

Thanks anyways,

Nadav.

kisori - November 22, 2014, 9:59 am

Once you purchase iSpy Keylogger you will have an account. The keylogger installs on the victim when opening the file created using the software, correct. There is an option to start with windows so yes.

expwaste - November 25, 2014, 12:02 pm

few questions:

where can i buy this?

Does it work for runescape 3 aswell?

Is there a binder included? (if no, where can i get a good one?)

thx in advance

Vuln - November 26, 2014, 8:18 am
