Can anyone help me setup my wifi repeater?

I'm willing to use team viewer, it would be very much appreciated as i can barely use the internet lately cause of bad connection.

Not sure if this is what you need, but this is what it says on it:

wireless-n repeater

Connect your ethernet cable and it should be fine? What's your problem?

It's not that difficult, make sure you connect the Ethernet cable, also from your main router you should see advancing setup or settings. I can help if you want.

Yep. Looks like the repeater isn't a WiFi repeater.. more like a hotspot.
