(I am not a support , i just know this , have used Steam stealer before).

Having different ip's on each account isn't needed, nor is having that many.

There are ways to securely transfer items to the main without all that hassle.

It is allowed to have several steam accounts so :p

The cheapest one i've seen, one bin without any support or anything (dno if its even fud) goes for around \$40. Im selling mine for \$20 which is 101% FUD.

So i wouldnt say that \$20 is overprices when almost all of my customers made them back within a hour.

The stealer is cheaper becuse, i dont know. I just want it to be cheap and want my customers to be hapy insted of paying \$50 for a crypt when you could be trade banned and pay \$50 more.

This is currently 1/40 atm i think. But will refud the stub tomorrow with a private crypter.

Bought this product a few days ago. Edin has been very, very helpful with all the nooby questions that I had, and helped me a ton to get started.

While I can definitely verify that the product WORKS, then it, for me at least, requires a ton of luck. I have gotten two trade offers, while spreading it on literally hundreds of groups, sites, and whatnot.

To everyone considering to buy, definitely, go ahead, it's a great project, but I would like to say that it requires a great deal of patience and work, unless you get super lucky.

Thank you for a great product Edin!

Yes, I can explain everything to you via Skype :)
Your dummy account might get banned but since you're importing to your main or to another
dummy and then to your main, you'll stay fine :)

Yes you will, the guide is very noobfriendly.

You have to put like 1 hour per day with it (if you want more skins then more ofc)

Could also sell you other private methods, just let me know!

There is always a risk for something, but its really hard to get this patched. If i do, then I just re-code it. Will work until Steam remove the Trade-Offer function lol.

Haha, in laughing about this.

This Guy Steam contacted me for a while ago asking for partnership.

I told him that he could work for me a bit and if its going good ill give him some % of my sales.

He said OK and we started.

He did well the first 1-2 sales so i decied to purchase him a CSGO copy (14€)

Once that he was not online that much, started hes own spoofer etc. I TRIED to ignore him for 4-6 days. About after a week he contacted me asking how much I made and he made. I told him how much I made and how much I was supost to give him.

Ended up with around \$250. I was going to send it but that wouldn't work (We cant send your payment right now."

So I tried to transfer them to my bank. I did that and it got limited cuz a chargeback (and yes I know who did it)

Then this kid spamming me that he want the money..

I don't understand. Does this mean that Lemmon's version has been patched? If so, that could be the reason why both owners are ignoring everybody.

I'm considering buying yours since the other guys won't reply to any of my (or anybody else's) messages. Such bad support they have..

And if I were to buy the two stub package, would I be able to take one stub now and the other at any later given time? Just wondering. Thank in advance :)

If I bought the package without updates, could this product stop working in the near future? Or are the updates just for adding features to your product?

This will probabely work until steam removes trade offers lol. So, i dont think that really. Updates, well if your file stopped to work etc. Or getting unfud, dno.

It is FUD, you're using a detected icon/assembly (probably the ESEA icon)

Change that and it will be fud.

Also, this isn't a support thread. If you post here again (sales trashing like this) you'll perm ban from my services.

Jesus.

This file was a example from a customer that bought a package, which is today un-fud ofc.

Its getting detected after around 2-4 weeks and after that I offer everyone free FUD updates.

I can generate a stub right now and upload it for you, if you dont believe that it's FUD.

?Well if the file was an example then why didn't you say so. I didn't mean to come off rude but then you accuse me of sale trashing (which I wasn't) I am saying it for the benefit of everybody. So when you upload a new link with FUD people can see its FUD. I am considering buying it. I just need to make sure its FUD.

You can rename it if you want, change icon, assembly...

You have to be logged in on the Steam acc where you getting the offers to make the Auto Accept bot to work.
