Thread: [Digital Crypter Public FUD Scantime and Runtime \(0/34\) No Dependencies \[Free\]](#)

AlphaRays - November 2, 2014, 9:31 am

Hey hf buddies, I've been back after a long time and decided to contribute my work to hf community. here is my crypter's public version. It is 0/34 Fud Scantime and runtime both.

Download Link:

[Digital Crypter](#)

You may need to register actskn43.ocx

Run cmd (As administrator in windows vista/7/8) and paste: Regsvr32 /s actskn43.ocx

More Details: <http://support.microsoft.com/kb/146219>

Rar Password:

Find the value of x. $18x + 12 = 16x + 20$

Convert the value of x into word like if you got 12 in answer then convert it e.g: twelve. Encrypt this word using md5 encryption.

Encrypt the md5 hash again and thats the password of this rar file.

Remember: Don't scan crypted file, stub or builder on virustotal or jotti scanner. Scan it on nodistribute.com.

/ Weak in maths? pm me. */

Update:

Ok I've uploaded all ocx files required to run builder. Instructions included.

Look good! I like when peoples share tools for free

Moon Rock - November 2, 2014, 9:38 am

Aww, wtf is this math class, can I just get the password please ?

NJKL - November 2, 2014, 9:41 am

Amazing, can i have the password? Thank you in advance +1

CorpseMory - November 2, 2014, 9:48 am

$x = 4$

give me the password please :')

after it's : four

md5 : 8cbad96aced40b3838dd9f07f6ef5772

re hash : ca2a4e3311d1533a134070e08e1ba9e9

done ?

EDIT : OH YEAH I'VE THE PASSWORD !

light133 - November 2, 2014, 9:51 am

I solved the password, but when i try to start the crypter there is a error about actskn43.ocx? I need a kind of program/component to register actskn43.ocx? Thanks is advance.

lima007 - November 2, 2014, 9:55 am

Thank s man i will try it later! Good share

Yea, I got the same error. Waiting for answer. :)

AlphaRays - November 2, 2014, 10:09 am

What happened? Tell me the error you got

Mr J Smith - November 2, 2014, 10:12 am

I can't register the .ocx file either, I'm using Windows XP SP3.

CorpseMory - November 2, 2014, 10:12 am

"Component 'actskn43.ocx' or one of its dependencies not correctly registered : a file is missing or invalid"

but i followed the instructions

TehLunat1C - November 2, 2014, 10:15 am

Hello i would be glad to download it but i am not good at math and I dont have enough power for PM yet ...Can you tell me the password?

Thanks in advance :)

AlphaRays - November 2, 2014, 10:15 am

Copy actskn43.ocx file to system32 folder and then register it: Regsvr32 /s actskn43.ocx

Mr J Smith - November 2, 2014, 10:28 am

Thank you very much! I can confirm that my BlackShades server is now 100% FUD and full working :D

Working on scantime and runtime :)

I would post the virus scan link but I haven't got enough posts.

Google it. These files are available on the internet. I've only included actskn file which is difficult to search on google.

TehLunat1C - November 2, 2014, 10:43 am

Thank you really much you are great :D

I try to register but it doesnt show anything and when i try to open the crypter it says the same thing...

Wtf is this math class can you just pm me the pass please?

and the answer is 4 and i tried "4" and "four" and still nothing

winou - November 2, 2014, 1:36 pm

Well i try to register the .ocx file and it still gets me error any solutions?

????? - November 2, 2014, 1:48 pm

I have registered the ocx file, but still get an error. Restart computer or what? Im running Windows 8

(Nov 2, 2014 02:48 PM)?????- Wrote: [\[CITE\]](#) I have registered the ocx file, but still get an error. Restart computer or what? Im running Windows 8
Copy actskn.ocx file and paste it in system32 folder and then register it.

shailbpl - November 2, 2014, 4:10 pm

does it only crypt native files? or it support .net too

Moon Rock - November 2, 2014, 5:35 pm

I had to get a total of 2 extra files for it to work. So I coded my own survey locker and the detection rate is 5/34 and now with the crypt 4/34, don't think it did so good. However I had the default program stub.

winou - November 2, 2014, 9:14 pm

I do copy the file to system 32 then i register it and it doesnt works... im running windows 8 pro

ZexyChronik - November 2, 2014, 10:05 pm

so i scanned and i got 49/54 so not even close to FUD

Infinity. - November 2, 2014, 10:08 pm

Save yourself the trouble, x is 4. :P

Hicupish - November 2, 2014, 10:15 pm

I managed to get the password, I place the actskn43.ocx file into my System32 & Opened up CMD as Administrator and installed it. But when I goto open the "DigitalCrypt.exe" file it just comes up with an error displaying "Component 'actskn43.ocx' or one of its dependencies not correctly registered: a file is missing or invalid? Would be really nice if you could help me out on this problem because I'm fairly interested in your work :)

tisla - November 2, 2014, 10:25 pm

now I get a comdlg32.ocx error plzz help

Black Arrow - November 3, 2014, 12:20 am

I got the same problem than zedred12, could you help me please? :)

peeky - November 3, 2014, 2:22 am

Me to, maybe it has someting to do with a Win7 x64 system?

Dazeew - November 3, 2014, 4:11 am

It doesn't work on 64 bit systems, i had to install 32 bit windows 7 to make it work and its 0/34 FUD on nodistribute.com thanks bro a lot :)

AlphaRays - November 3, 2014, 4:26 am

It does work on windows 7 64 bit. I think the problem is with the builder dll files.

(Nov 2, 2014 11:05 PM)ZexyChronik Wrote: [\[CITE\]](#) so i scanned and i got 49/54 so not even close to FUD

where did you scanned it? Did you scanned it on virustotal? I've just scanned it and now it is 1/34

shailbpl - November 3, 2014, 5:49 am

does it only crypt native files? or it support .net too

It works with some .net file but It works with c++, vb6, c, autoit files for sure.

shailbpl - November 3, 2014, 5:57 am

please dont give it to everyone...some noob will scan it on virustotal and spoil your all hard work.
