Thread: [WHATSAPP PANEL | BOT | MASS/BULK MESSAGING | WEB BASED | FIRST ON HF |](#)

Blackbullz - November 2, 2014, 11:42 am

Introduction

Ever wanted to spam people on whatsapp, advertise your products and send messages and images just with 1 click? Here is the solution for you. WhatsApp Panel is self coded web-based software that will help you advertise your products and send mass/bulk messages or images through the WhatsApp Network to any number you want.

Features

Everything is being sent through Proxies

Live Single Test Message

Unlimited ammount of senders allowed

Scanning/Filtering Numbers if they have whatsapp or not

Multiple Campaigns at the same time

The sending statements can be seen(Pending, Completed, Failed)

Options that control the delay between the messages

Functions the Software can perform

The software can send messages to all numbers that have whatsapp installed

The software can create multiple campaigns and send bulk messages

The software can send images

The software can validate numbers by checking if they have whatsapp installed and then export only the ones that do

The way the software works

You can load a list of proxies firstly

You can add as many senders as you want with valid password(can be generated with the WART tool)

You can then import senders from text files or add them manually 1 by 1

You can import text files filled with numbers and then filter them for whatsapp activity or you can filter them 1 by 1

Once you have your receivers all you should do is paste/type them into the Campaign page, set a message and click 'Add Campaign'

You can see the statement of the messages(pending, failed, completed)

Price

\$50 The full script is send to the costumer

Full Installation of the software on the costumer's system

Full Support

Updates

Lifetime Package

\$25 The full script is send to the costumer

Basic instructions of the installation are given to the costumer

No Support

No Updates

Lifetime Package

[Is this software legal?](#)

Yes,this software is completely legal.

[Can I use this for spam and mass messaging?](#)

Yes off course.

[Can I send messages from random phone numbers\(senders\)?](#)

No,you cannot send messages from random phone numbers.The numbers should be valid and have a password generated(through WART Tool)

[How many messages can I send with 1 sender?](#)

Well,you can send from 50 up to 1000 messages per day from 1 sender.It depends on the delay between messages that you set

[Can I bypass any WhatsApp Limitations by using this?](#)

Yes,using this you can send up to 500 characters per message while the WhatsApp limit is 160 characters

[Do I take any risks using this software?](#)

No,you don't take any risks using this software.That is simply because everything runs through proxy servers.

[Do you offer refund?](#)

Yes,we do offer full refund only if there are clear evidences that the software doesn't work.

[Can I use this on other devices?](#)

Yes,you can use this on all devices as long as you have access to your VPS,Dedicated server or Web Host

Vouch Copies Left 6/10

Vouches

Thanks bro

I might be adding more features soon

F0UNDER - November 2, 2014, 12:11 pm

If you are willing to give any vouch copies, i would be interested. I will be able to review it well. As i have good knowledge of websites and their development too. As soon as you send me the script, i will set it up and write a detailed review/vouch in your thread. PM me if you are interested.

Hey bud don't bump the 2014 thread

Look the date it's 4 year old and thread creator is banned also
