Thread: [Rat/Bot \(Or w/e malware\) Testing Service! \[FREE\] \(Multi OS\)](#)

zilo - November 2, 2014, 4:43 pm

First of all this service is only for:

- I33t / Ub3r members

Or

- Regular members that registered at least 1 month ago, have positive reputation, and at least 100 posts.

What I will do:

I will run your malware on any requested OS (List below), I can change some settings like firewall, AV, administrator, Ram and CPUs..I can also Install required dependencies on request.

I will chat with you via Skype (or other IMs, on request).

Available OS list:

- Windows 95 (Offline only)
- Windows 98
- Windows 2000
- Windows XP (32 bit)
- Windows Vista (32 bit)
- Windows 7 (32 bit) (Any Version)
- Windows 8
- Any free Linux distribution can be installed (32 bit)
- Cent OS 6.5 (32 bit)
- Mac OS X 10.8 Mountain Lion

How do you request the service:

Pm me or post your skype/Other IM ID and I will add you

Gemini - November 2, 2014, 7:31 pm

I just pmed You... I really need my server tested.

Aeolus - November 2, 2014, 11:26 pm

I Have made a email bomber but can't test it as my internet speed is very slow! So can you test it on your any high internet speed computer!

Thanks!

Thanks!Sure, just PM me your skype!

@Geminizi I added you on skype

SIM-2223238 - November 3, 2014, 2:28 pm

I need to test my RAT out, can you send me a PM? :p
With your skype.

zilo - December 12, 2014, 3:53 pm

I can still do this, post here if you need this! :)
