Thread: [Windows eight Watermark Remove Tool \[VB.NET\]](#)

SIM-1984933 - November 2, 2014, 8:05 pm

that time of year has rolled around ;(i hate windows but i love it.

this BS watermark pops up asking me to Reactivate my windows but i cant use my old lic so i said FUCK YOU MICROSOFT. so i opened up VB.net

And Made a small Tool to Temp Remove the Watermark and show you how to reactivate windows Without that online checking BS. well here it is.

<https://www.virustotal.com/en/file/3d0dbe3ce9e3d1e60bb82a7ed9abc384b952df20a883aa492c10255051c2cc8d/analysis/1414987156/>

Project Download

http://www.mediafire.com/download/a31ed0as4gd6me5/WaterMarkRemove_tool.exe

Screen shot of application

<https://gyazo.com/42789976bcd1bc6e1253d05555ed059d>

p.s you have to run the application on Elevated permissions aka "run as admin" so it can edit reg values

now ima go fix my fucking windows

TRH4CK - November 2, 2014, 8:10 pm

Just checked the code and it looks legit behind reflector :)

SIM-1984933 - November 2, 2014, 8:21 pm

lol @TRH4CK

yes it legit but i dont have a LIC key for windows 8 so im still fucked :(

Obama Nukes Russia - November 2, 2014, 9:46 pm

Any screen shots of the project?, I would appreciate it man

420 Blaze It - November 2, 2014, 9:47 pm

Very legit, thanks for this OP! :D :D

just decompiled you app and is very simple and so it should:

PHP Code

<?php

Private Sub Button1_Click(ByVal sender As Object, ByVal e As EventArgs)

Interaction.MsgBox("WaterMarks Removed Please Restart Or SignOut for this to take affect.",

MsgBoxStyle.Information, "Removed Watermarks")

Interaction.MsgBox(

"Press Windows Key + R then type slui 3 and hit enter: then enter a new key!(After This app restarts Explorer.exe)", MsgBoxStyle.Information, "New Windows Key")

MyProject.Computer.Registry.SetValue(

"HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Windows NT\CurrentVersion\SoftwareProtection

```
Platform\Activation", "NotificationDisabled", "0")
Dim processesByName As Process() = Process.GetProcessesByName("explorer")
If (processesByName IsNot Nothing) Then
    Dim processArray As Process() = processesByName
    Dim num As Integer = 0
    While num < CInt(processArray.Length)
        processArray(num).Kill()
        Me.Timer1.Start()
        num = num + 1
    End While
End If
End Sub
```

But i do have a question why have this timer?

PHP Code

```
<?php
```

```
Private Sub Timer1_Tick(ByVal sender As Object, ByVal e As EventArgs)
    Dim processesByName As Process() = Process.GetProcessesByName("explorer")
    If (processesByName IsNot Nothing) Then
        Dim processArray As Process() = processesByName
        Dim num As Integer = 0
        While num < CInt(processArray.Length)
            processArray(num).Start()
            Me.Timer1.[Stop]()
            num = num + 1
        End While
    End If
End Sub
```

        While num < CInt(processArray.Length)
            processArray(num).Kill()
            Me.Timer1.Start()
            num = num + 1
        End While
    End If
```

End Sub

But i do have a question why have this timer?

PHP Code

<?php

```
Private Sub Timer1_Tick(ByVal sender As Object, ByVal e As EventArgs)
    Dim processesByName As Process() = Process.GetProcessesByName("explorer")
    If (processesByName IsNot Nothing) Then
        Dim processArray As Process() = processesByName
        Dim num As Integer = 0
        While num < CInt(processArray.Length)
            processArray(num).Start()
            Me.Timer1.[Stop]()
            num = num + 1
        End While
    End If
End Sub
```

The timer is to restart explorer.exe. the interval is set to 500 witch is 0.5 secs

this is to give a nice rest period between killing and restarting the process.

you have to kill the explorer.exe to reset the interface for the watermark to be removed. hope this answer your question.

you have to kill the explorer.exe to reset the interface for the watermark to be removed. hope this answer your question.

You could of just use multithreading, make a sub to do all that is needed and then make a thread to trigger that sub... that just how I would do it anyways
