Thread: [2GB RAM Free VPS for 12 Months {HOT}](#)

Black Cobra - November 4, 2014, 11:30 pm

Hello,

Do you want a VPS to run a web server or maybe a VPN or a RDP ?

Well this time you'll not have to pay, just register & get free \$32 credit.

Well here you go : [Registration Link](#)

Specifications you'll get :

-1 cpu core Xeon (3,7GHZ - Dedicated core use 100% as you want)

-2GB memory

-1TB free traffic (cachefly 78mb/s)

-DDOS protection (Hundreds of gbps)

-20GB SSD Disk (IO: 300mb/s)

Use this link after logging in to get \$32 credit : <https://cloud.runabove.com/signup/?launch=power8>

NOTE : You'll have to attach a valid credit card for this & they'll charge \$1 to ensure that it's a valid one & they will give that buck to you after few hours/days.

I'm not the provider, it's OVH behind that :)

Let me know if you have any question or confusion :)

Thank you !

I can't figure out how to port forward with this dedicated server and I'm looking through their community posts and a lot of other people are having the same problem.

Have you successfully PF'd with this provider? If so, please let me know how to do it.

Thanks.
