Thread: [Tupac Thread Design | Free Design | Neat | Direct Download #1](#)

Archives - November 5, 2014, 2:12 am

Hi Hack Forums,

I'll be providing a lot free Thread Designs and their PSD.

Actually I haven't designed it at all. I have used only one font, which you can download [Clicking Here](#)

Please, I haven't focused on text design, You need to do it on your own, I only mentioned what you need to do on the following place.

Preview Design ([Click to View](#))

Download Design ([Click to View](#)) [Click Here to Download](#) [[SendSpace](#)]

Thanks, I'll be releasing more Thread Designs.

It's a nice thread design, but i don't see the connection with Tupac?

Thanks for the share!

GhostRolly - November 5, 2014, 3:52 pm

Good design.. Really clean and unique.

Archives - November 6, 2014, 12:09 am

Thanks, I'll be releasing more soon.

Thanks for the share!

Would also like to know how this is related to Tupac?

Thanks for the share regardless!

Not to bash on your design but I have a couple suggestions for you...

First: The text isn't even centered... Really?... You couldn't take a second to center it quick?

Second: Include the full icon pack you used in the DL, or at least link it.

And Finally: You should really do something with the text in my opinion... Right now it's pretty much just 5 rectangles with some text on them. Unless that's the look you're going for I would suggest you make some headers... or some containers... add some texture... drop shadows... play around with

some different shapes. At least put filler text in the thread, that alone will make it 10x better.

Just a couple suggestions! It's looking a lot better than my first attempt at designing a thread, keep it up.

Great first attempt my man, but I won't be using it.

I'm pretty sure you can make better! :)
