Thread: [\[TUTORIAL \] Earn \\$20 daily with an imacros + payments proof. Must see](#)

tartou2 - November 6, 2014, 10:52 am

Hello hackforum members

i want to introduce you a new surf traffic website. www.trafficsia.com is the best surf traffic website where you can earn points by surfing other people links and exchange the points to money instantly where you can withdraw anytime.

It is totally free and easy to use. Simply register and start surfing in just few steps.

All types of links are allowed including adf, bit, and all such links.
They also the ability to get twitter followers for free.

The best of all is that you can assign imacros script to make run by itself and make you some money. Tested and it works. I know 30-45\$ is a good amount but it is true and best of all it pays for real not like most website. The secret is to upgrade your account to gold. I upgraded my account to a gold membership so my earnings have boosted 10x times now and have withdrawn 2 times so far and i am very satisfied with the earnings for so far

My payment proof:

[img]http://s30.postimg.org/ureis9a1d/image.png[/img]

If you want to sign up and help me for making this thread ask me for my referral link, and this is a quick tutorial on how to use this website:

1- Go to the signup page, fill all your info and don't forget to tick the button where it say "I am 18 years old or above and I agree with Terms and Conditions of Trafficsia"

2- Verify your account from your email

3- Login to your account and go to the exchange page, select surf and you will have to click on the confirm button every 20 seconds.

Newly they have added the option for autosurf to gold membership so my advice upgrade your account to gold as you will be get more privileges.

if you are gold, don't forget to activate the autosurf button from the setting tab from the exchange page.

if you want a more detailed tut about trafficsia see my second one from here:

40 tabs here,fully automatic.
Also,have you already cashed out - Op?

I've collected more than 2000 clicks, then it i came back and saw that it is stuck at 2000, i did exchange my points after and now they seem to allow only 1 tab for me or else the clicks don't count. :/

No, I haven't cashed out yet, cuz they only allow 20usd.

Blackout23 - November 9, 2014, 6:44 pm

i cant even login to this site i created an account and waited for verification code, it never came then when i click resend code a 404 page comes up, this raises red flags for me and makes me wonder if this site is even legit.

tartou2 - November 9, 2014, 10:16 pm

It works perfectly for me, script work just fine for me, i open the tab, run the script and leave it running with none stop day and night. I have cashed out 2 times before now, the first was for \$20 and the second for \$10 when i bought the gold membership. Now with gold membership, i can earn 10 TEP in every page i surf, that's 10x faster and the minimum withdraw amount is decreased to 10\$ so yeah i can say it is legit and pays

It's back to 10k = \$1. I should've converted my TEP yesterday ...

10000*20 = Minimum seconds for 1 dollar.
55.555 hours for 1 dollar
Easily can run 10 at once (bot)
5.555 hours per \$1, \$4.3 a day
7 days = Gold membership
Then you're at \$40 a day.

Might be able to cut the time in half with another 10 running, but it may block your IP as a DoS protection. I could easily add proxy support with that bot too. Get some private IPs, and you're good.
Best thing about this site? The captcha's answer can be found in 2 areas within the source to login ...

I did a little bit of testing.

1 browser multiple tabs = Must click next on 2 pages in a row
1 browser 2 windows = Same
1 browser + 1 private session = Works
2 different browsers = Works

I just have a program that opens up multiple processes using the WebBrowser control. Might make it a little more error proof as it doesn't work for long before the site gives a 403 or other temporary error.

However, if you make some e-mail addresses (each one from a different provider), add some aliases to your paypal account and use multiple VPNs (Or VPS, each one from a different provider) so you can multi account without being caught.

A VPS usually cost 10% the Gold membership (Which is fucking expensive)
I've got a lot of private proxies, so those should work too. My method is in my previous post.
Multiple browsers + private sessions will work for the average person.

Automating account creation wouldn't be hard. Already have a decent automation of the traffic exchange.

I think it would be possible to make everything autopilot from signing up to before withdrawing.

Found out you can't quickly load pages.

Instantly click button once it shows = chance of no TEP + need to wait 40 seconds to get 1
2 pages load at same time = Only counts once

Got it fairly efficient (15 running) by checking the time randomly (1-5 seconds) and forcing it to find the button and wait before clicking.

"Total Websites Visited Today: 4339"
Less than 30 minutes
"Total Websites Visited Today: 5063"

Would be great with a Gold membership.

Yeah I want to know too if using some kind of protection we can avoid ban. I got banned for 24h too because I collected about 5000 TEP in a couple of hours using a script. I'm assuming I'm banned as I can't log in anymore lol. I guess you could create 20 accounts and run proxies through each one? You can get very creative in making a bot that appears to be human and leave it running on an RDP.

Scratch that. I can log in again ... Might've been an issue on their side? At 12.6k TEP right now (~8 hours).

Thought so too. Worst case is a manual input of the captcha, which is easy enough.

Maybe they'll do the 1000:1 converting when Christmas comes around. Should have a nice amount by then, if I don't get banned.

gabry-hitsugaya - November 13, 2014, 1:04 pm

Oh God... I should have converted my TEPs... Now it's again 10000 TEP for 1\$. Now it's very hard

to cash out without proxy, vpn, multiple accounts or script. I think I'll give up with this site. Now you have to collect 200000 TEPs to cash out. It's like they pay you 0,0001 \$ for one click, less than other PTC.

The only way it's to have a script running like 50 instances simultaneously... Without getting banned. XD

I feel like 1000:1 was "too good to be true" type of deal. I left for school (2.5 hour class) and got over 4k points. If I had gold, that would've been about \$40. 10000:1 is a lot more reasonable.

I feel like it has something to do with the sessions. They changed the Captcha to use the session to store it, rather than in a hidden input element. You can bypass the single browser by using a private browsing session or multiple browsers.

Took them ~4 days for them to ban me for using 10+ browsers.

You want to make money by cheating while you may go to any PTC and follow the rules.

Try having a different approach. Follow the rule or invest in your earnings. People invest there money to get a bigger profit in return so don't expect to make much without investing

Okey, I've read the whole topic and i find some of your idea interesting.

I would also want to see that method with 10+ browsers.

I am currently using auto clicker with 2 PCs. Google chrome + hidden tab. With 2 taps i dont get TEPs aswell.

Thank you for the share of the site.

SL x TnT - November 14, 2014, 12:15 pm

Even though I'm banned, I'm still earning TEP (2 out of 10 got signed out). Currently at 36k now. Doubt I'll try to exchange for money. Just having some fun learning.

I'm using a C# application I made. Annoying way to do it, but you need to use multiple processes.

Go to webpage

Sign in (manual captcha currently)

Go to traffic exchange

----- This is how I did it

Check for button randomly (changes every check) 1-5 seconds

Once it finds the button, wait for another check (prevents instant clicking of the button)

Click button

I have another check of "if it doesn't change pages in 2 minutes, start over." Worked well when the captcha was auto.

It's easy enough to add individual proxy support & account for each browser and also make a main

program to manage everything.

Except for the small issue of them ruining my method of using multiple browsers :/. Made over 20k TEP while I was banned, ironically.

It seems like they made it to 1 login per account (maybe IP). If you login from another browser, the others get logged out. Pretty sure they use sessions to only allow 1 tab too.

Have any ideas on how to bypass that? They are doing a pretty good job on fixing their issues.

I don't know the method, but this is what I'd try ...

The button shows up after 20 seconds is a simple submit. If they forgot to check the time between page load to submission, you should be able to automatically submit the form without the button there. There are hidden elements that hold key values too. Make sure those are sent. I was thinking of trying that earlier, but didn't feel like it.

Unless you're using a new account, I wouldn't recommend trying to bypass their timers. It would be easy enough to catch someone getting more than 1 TEP every 20 seconds.

That's why i am not daring to try something new by myself. I don't want to risk losing my gold membership especially that many got banned for cheating.

I tried once using inspect element to add the submit button before the timer ended but i got an error message. So i don't want to keep repeating or doing tests on my account.

well theoretically if you click every 20 seconds with no crashes no delays etc then it'd be 10.000 clicks pr dollar, $10.000 * 20 = 200.000$ seconds which is roughly 2 days 8 hours pr dollar..

For me it is still profitable, you need to invest in buying a gold to make money. You can't expect to sit and the money will flow. No investment = no return

I have been using your method for 3 days now. I have almost made 4\$ which means 26 to go if I want to pay back what I spend on it.

I cannot run the bot for hours on time as I keep on getting logged out automatically.

Now received a message from their site saying that I have been using a bot and if I continue my account will be banned. Obviously I don't want to get banned and loose all my money so how long do you run your bots for to ensure my account isn't under watch but I still maximise my profits.

Thanks!

when i wrote this tutorial i was looping my scripts with non stop but now i count on my referrals to make me money. I have +600 referrals and they make me like 40k TEP per day.

So if you want my advice, make a tutorial and post it multiple forums so you can get many referrals.

If you have a gold membership then you should have no limit for number of referrals.

(Dec 15, 2014 05:56 AM)Retarded Scrub Wrote: [\[CITE\]](#) Is 1 tep 1 Cent ? Or what can i do with the tepts?

you can convert the tep to cash.

10000 tep = 1\$

sumirart - December 15, 2014, 7:43 am

1 surf = 1 TEP

\$1 = 10.000 TEP = 10.000 surf

10.000 surf 20 seconds = 200.000 seconds

200.000 seconds / 60 seconds = 3.333 minutes

3.333 minutes / 60 minutes = 55,5 hours

so i need to surf about 55,5 hours to get \$1

but if i upgrade to gold membership :

1 surf = 10 TEP

\$1 = 10.000 TEP = 1.000 surf

1.000 surf 20 seconds = 20.000 seconds

20.000 seconds / 60 seconds = 333 minutes

333 minutes / 60 minutes = 5,5 hours

if i upgrade to gold membership i need about 5,5 hours
right?

and the problem is i dont have money haha so i need to upgrade it haha

\$1 = 10.000 TEP = 1.000 surf

1.000 surf 20 seconds = 20.000 seconds

20.000 seconds / 60 seconds = 333 minutes

333 minutes / 60 minutes = 5,5 hours

if i upgrade to gold membership i need about 5,5 hours
right?

and the problem is i dont have money haha so i need to upgrade it haha

Nice share man. Thanks. I created my own iMacro out of the outdated one -Wolf shared.

I have never even touched macro code before, and I did it. Pretty happy. Although, it is custom fitted for my slower internet connection. I could easily customize it for faster connections, but for now, I am going to hold onto it until I can payout.

EDIT: I keep shaving seconds off of the time it clicks through. I love it. It's basically instant, with a full proof protection feature. Jesus, I love code, and even if it is iMacro, which is basically English.

EDIT2: Does iMacro's have if / or statements? If so, I can make it go even faster.

No man you cannot link between java or python with imacros as they are server side scripts while imacros is addon script on your pc

No man i wasnt talking about linking, i was talking about similar command in macros script. I just dont know if it has such an option. That was my question ;)

What ive found that far u can use javascript in ur macros in EVAL. Or use macros in javascript. In ex in conditional statements like

```
if case A(look up certain element in page source code):
  use macros1
else:
  use macros2
```

Yep, u'll need FF for that, idk why but chrome won't recognize .js extension in the directory. In FF u can run straight js code. Just set up counter, conditions and exceptions. ^^)

Thanks for this guide,,,,, im checking the forum,,, so i can make some bucks for my studies,,,,

avtaRil - December 19, 2014, 11:36 am

As I wrote before I had an issue - sometimes browser failed to load the page even though i was logged in. After manual refresh everything went back to normal. It can be quite annoying if it happens when ur AFK. As im new to imacros and JS it took me few hours lol, but here it is ^^

Quote:while (true)

{

var ret;

iimPlay('CODE:WAIT SECONDS=2') // just in case it will lag a bit

ret = iimPlay('CODE:SEARCH SOURCE=TXT:"surf page" IGNORE_CASE=YES');

if (ret !== 1) {ret = iimPlay('CODE:REFRESH')}

else {ret = iimPlay("C:\\Users\\TheGod\\Documents\\iMacros\\Macros\\Demo-Firefox\\traffic");};

//change this line to proper directory for ur system. link to macros u wanna use. dont forget //double slash

}

OUT OF DATE, TESTING NEW VERSION ATM

Copy it to notepad++ save with .js extension and add to macro directory (u'll need FF, won't work with chrome)

Find it in the list and just click play. It's in endless loop already and if browser fails to load page (script will fail to find specific phrase in src code and will refresh page, otherwise it will play ur macro. Feel free to contact me if u'll find any bugs. And yea, i changed waiting time in macro from 30 to 26 secs.

run js code along with autosurf, what would monitor page status, as soon as it will logout script will type ur Login and Pswwd get captcha from src code, send it to captcha solving service, get response, type it in, sumbit and moe back to traffic exchange. Idk maybe u can even do that with imacro. In js u can just loop it in script so imacro won't have to replay it. The only thing is that idk atm is how to get cpatcha pic from src code, but im pretty sure it should be easy.

Thats just my suggestion

Nah, getting captcha is not that easy. ^^

Well, i found a way to get png file of capthca in FF, won't work in chrome. There a lot of online services providing capthca solving smth like 1\$ for 1k pieces. I still dont know how do they send the answer but im pretty sure imacros can hadle it.

And yeah, I noticed that with autosurf it logged me out every hour or so, what never happened before when i used my macro so im using it again.

Yep the best shot is to buy gold and activate the autosurf option and let it run by its own

fazefanboy22 - January 5, 2015, 8:43 am

Even with the gold package, that's 1000 clicks for just £1.

That's 20,000 seconds (almost 6 hours) of constant surfing.

"\$20 daily" is a bit of an exaggeration... If someone was to run this 24 hours a day they'd only earn £4 a day.

And that's with the gold package (£45).

This practically gives you no profit at all... waste of time, imo.

You are completely correct. You'd end up making ~\$90/month (that's after the -\$30.00 for gold). This averages out to about \$4.3/day, if you were running it for 24 hours nonstop.

iTzNiiBz - January 19, 2015, 5:47 pm

You can't make \$20 a day unless you have a shitload of referrals. Do the math. even with Gold it is IMPOSSIBLE to get a \$20 payout perday. unless you have over 500 refs don't bother wasting your time.

DFWi Reaper - January 19, 2015, 8:54 pm

Welp, came home and I can't even get on the site?

Used the bot and they suspended my account, plus it takes ages (12hrs) to make \$0.1

//The Storm - January 20, 2015, 2:50 pm

Actually its not \$20 is \$5 XD. 10,000 = \$1. With a Gold upgrade it takes 5 hours to get 10,000 there for its like \$4.50 per day...

illinifan - January 22, 2015, 1:32 pm

yes it is still working, i suggest you multiply your earnings legally, i know many have made several accounts and they got all their accounts banned and paypal refused to pay them their money back. Get legal referrals and you won't have to worry about when you will caught.

They logged me out after 15 minutes. I'm using the autosurf in trafficsia. What can I do? Someone else got this issue?

Limited Edition - February 4, 2015, 6:31 am

I've been told using a VPN gets your account banned, I already guessed it would. What about using a VPS tho? I would love to run this on a VPS so I don't have it eating what little resources I have on my PC.

IF it is allowed on VPS, could I upgrade 10 separate accounts and run them all on different VPS meaning I will have 24-7 earnings multiplied by 10 (Obviously I would use a different paypal for each one to cash out.)

zyzzalive - February 4, 2015, 7:53 am

24-7 earnings are hard to get, they log me out after 3 hours or something.

So at night, i cant get quite a profit or i have to put my alarm 2-3 times a night.

zyzzalive - February 4, 2015, 1:43 pm

I get more and more sceptic, it logs out at random times. sometimes after 5 minutes. So when you expect to leave your pc on autopilot, dont think you get all you deserve.

The sites trafficsia shows, there are only 3-4 sites, i honestly dont think they get such a big profit out of that.

Are there any people, except the one from the OP himself, who got paid?

Every Ponzi needs to prolong it's lifespan. Disconnect is way to decrease your "virtual profits" and keeping you for longer, hoping you will bring few more referrals that will pay upgrade fees.

This forum section is FULL of real business model guides. Real service for real money....
I don't get why people don't browse few threads in MT section.

Yes it does log me out every like 6 hours but it is fine for I check for it every 6 hours and relogin.
I noticed that trafficsia cannot be logged in from several devices at the same time, it will logout your laptop if you open your account from somewhere else like your mobile or another laptop or something. Also opening a second account will logout your first account.

Just open firefox, run autosurf and leave your laptop working.

bl4ck1911 - February 7, 2015, 7:09 am

Well I have been in trafficsia for like 7 months but I actually started using it seriously when I upgraded my account in late november, so you can say in like 3-4 months.

I use 1 account, I won't risk loosing a milky cow account but I have over 2000 referrals.

You can buy gold everytime your membership ends. I always say this, the secret is getting serious referrals who are ready to buy gold because the more TEP they earn, or the more cash they convert the more you get TEP or cash from them.

Is there any other way to get more profit out of this other than just yourself sending traffic?

Maybe you could use a botnet or something?

Purist - February 24, 2015, 9:38 pm

Thanks for the script.

Good method.

This post was from 2014.

Any feedback if this still works?

Tartou2 if i upgrade to gold membership i will receive 10x TEP on only autosurft or also on twitter followers, etc.

Because if i run 24h autosurf with gold membership i ear about 4\$ per day.

Best Regards.

if you upgrade to gold, anything you earn it will x10. Twitter followers and tweets will become x10 and they offer x3 so you earn 30 TEP for every follow or tweet
