Thread: [Moderator service being offered \[+more\]](#)

designedBy - May 31, 2010, 5:26 pm

Hey webmasters of HackForums,

I'm currently going to offer up a free service of being a moderator/writer/etc. for a board/community/etc.

I've become increasingly bored with finding communities and I believe it will help to become a part of a firm community.

I'd prefer this community to be well-established, but I'll leave that to your judgement to decide.

If you have a website you think I should check out, please message me with the URL of said site. I have an experience list of moderation spanning from games to active communities, to my own websites.

I have good grammar as proven by this thread, and would appreciate any site giving myself the chance.

Thank you,
Warghh.

It depends on the subject I guess. Motivating topics will generate more though-processes than me blogging on algae. Who wants to blog about algae? No one. ?

I've never really established my own blog, but it's been something that I've planed on doing -- and think I could do successfully.

Are you any good with MyBB?

What aspect of MyBB? Moderating/Administration of MyBB? Sure. I haven't ever made my own addons or stuff like that if that's what you're wondering.

Spoke with Furple, currently helping him. Could definitely take on another task, though.

I got quite a new forum (1900 posts) that now needs another moderator (My website is www.bumpbox.net)

If you could join and then make some posts, me and my other moderators judging from your post quality will decide whether you are fit to be moderator or not.

You can join here: www.bumpbox.net

It's a MyBB forum dedicated to gathering source codes and enhancing graphical skills.

My username there is: Midas
