Thread: [Hacking tutorials clean up?](#)

Mutiny - November 7, 2014, 2:50 am

I swear to god but I don't believe in him but w/e, the hacking section is legit just a mass grave-yard of grave dug posts for 2012 and below threads, I think it needs everything blown the fuck up.

Kind of believe so, close everything besides the latest ones.

Why do you think I'm posting this to try and get more posts? It's a fucking suggestion lmao.

It would probably take too much time and effort, and good posts may be deleted.

Maybe not delete them but close them so they can not add comments. Or possibly archive them. If any one finds one interesting they can PM the op with questions about the particular topic.
