Probably a satan's nips, those are pretty hot. I would compare them to a thai pepper, probably a little hotter. The Hawaiian chilis have a really nice flavor; even though there small they can pack a punch.

I may be bringing in my business partner to the forums (which I know and deal with frequently in real life) due to how busy I am with orders, school, and work.

He shares the same honest HQ characteristics as my self; He actually just got his Masters degree in business administration from a private university.

You can still come to me with questions or comments if needed.
