Thread: [\[Free Method\]\[Fully Autopilot\] Easily Make \\$1-\\$3 Each Day \[Proof Of Payment\]\[Easy\]](#)

Louis C.K. - November 8, 2014, 6:46 pm

Today I will show you how to make \$1-\$3 each day with no effort. This method is fully autopilot and only requires effort for setup, after setup, just sit back and watch the money flow in.

Today I will introduce you a PPI (pay per install) Network with monthly payout of \$20 at your account. As some you might already heard of the Network called Installaxy, is a new network powered by the owner of Dreamcash. Now you've heard a little more about the network, let's getting started to earn some money.

1. sign up for installaxy: [In Order To Not Violate TOS: REF Link Moved to Refferal Section](#) (preferably under my refferal; all money earn under ref will be donated to charities?)

2. Navigate under the tab to Dashboard and choose Bundle. Simply this is a monetization tool for the network which allows you to bundle your own software with their promoted software. Fill in the info of your software and click generate. Software Name: a relevant name of your software that you are bundling with their promoted software. Soft version: put a arbitrary number in the form of x.x. Soft download URL, link that you uploaded your software. Finally hit generate.

3. Now choose a landing page, this is the link containing your software and their promoted software bundled together. All you need to is spread the link and when people download and installs the content, you get paid.

Now, some of you might ask, how do I spread my link and make people download the software. Don't worry, I will cover that as well.

-From personal experiences, I spread these links through YouTube ranking. You have to learn a little about ranking your video before monetizing with this method. so I would suggest reading guides on youtube ranking first.

- From the landing pages, I would choose Landing Page URL#2 or #4, as these are clean pages and have a countdown timer for an automatic download prompts. Also to reduce the lengthy URL, I use a PPC (Pay Per Click Network) to shorten my URL. So with a PPC url redirects, you are earning money with incoming traffic to your PPC plus profit from PPI installs.

I recommend # for PPC network: if you haven't register for a PPC network please register for # under my ref again:

[In Order To Not Violate TOS: REF Link Moved to Refferal Section](#)

Go ahead, get started on your journey to easy money. After all, this method is autopilot like I promised and only requires work for setup. After ranking your YouTube video and putting download URL in description, you are smoothing sailing your way to profit.

Not motivated enough? Here's some proof of earning from Installaxy:

Recent Earnings:

Spoiler [\(Click to View\)](#)

Total Earnings:

Spoiler [\(Click to View\)](#)

Payments and future payments:

Spoiler [\(Click to View\)](#)

In conclusion, this method only works if you put time and effort to setup the process. This means, your profit will have a direct correlation with the amount of videos you upload. This tutorial was written in a brief amount of time, so please be considerate on judging the content. As a matter of a fact, I want each individual to rate this tut on a scale of 1-10, ranging anything from consistences to helpfulness. As in the future, I will cover more ground on YouTube Video Rankings. Leave any questions, comments, concerns below.

good.. let me try it now ...thanks for sharing mate :)

Zerofix - November 13, 2014, 12:41 pm

wow, its pays \$0.48 for USA install? this sucks.
I am using PPI network that pays \$1.5 per USA install.

The ratio is so small because the network stated the viewer might be using a vpn. Is known as conversion errors, but the max payout for usa is \$1.96. The network you might be referring to is perinstallbucks, the payout ratio is only high for usa, the rest of the world is very minimal.
