Domanate - November 10, 2014, 3:41 pm

Hey Everyone! ?

My name is Domanate and I am the creator The Aqua Spammer.

I got good feedback on the first version, so since then I have been making Version 2 or the next one up. I finally am going to post the spammer update publicly and hope you all will enjoy it! I know there may be so glitches, so please report them, again its Alpha not release haha :) I will put any users who find a glitch in the credits in v2.2. Thanks for all the support and here is the link to download and for everyone who are new to the tool, I do not post a tool without a video. So enjoy watching the 1:10 min clip! <3

Thanks! :D

Well here is the thing, I usually do not give the whole code out, I can send little snips of it or screenshot it with portions of the code, i don't want all my program put out there :) Also, thanks for the complement! <3 I really appreciate your consent! ?

Please Look at my prier 1.0 of this program. The Serial Key is there, Also. If you even tried to see a preview it shows the serial.

Domanate - December 13, 2014, 4:56 pm

(Nov 16, 2014 01:31 PM)pasha_biceps Wrote: [\[CITE\]](#) You need license name + License serial? Not free....

I am Getting rid of the serial and will eventually require a login Username and a password for Independent users. Meaning you go on my site and register an account for free and get instant access. As simple as that. Reasons I am doing this is to track the amount of fans and users who actually use my programs. Not to mention, I can ban / deny access to any user if miss behaved. That is why. No other uses intended. I made sure it has a secure connection, I always want to put all of your security at safe. Then people will stop saying its not free because there isn't the main login info on this thread. Its just a sub update thread, not the introduction thread. But yes.

Thanks everyone for supporting us!

thank you! I am working on an API for skype use. Be on the lookout for it! :) And it will cost: Nothing. Absolutely nothing at no cost. It will have a Spammer for skype, without having to rush to the quarry box and it autopilots the spamming and you can be multi tasking and not even know your spamming someone!

its not, but its for lazy people. some people don't feel like opening up terminal and pinging the domain for the unmasked domain / ip. ?

thanks,
